

What's New with Course Inventory Management?

March 5, 2010

In the past few months, we have:

- Loaded users to enable the proxy edit function
- Enabled workflow for Course Inventory Request
- Implemented improvements to the search dialog
- Deployed the "Program of Study" Request & Workflow

What's Coming?

In the next couple of weeks, we will:

- Provide Cognos reporting for "Program of Study"

What's New with Course Inventory Management?

October 15, 2009

In the last couple of weeks, we have:

- Conducted a training workshop (train-the-trainer)
- Implemented email notification for a new note (each time a note is added to the form, the originator of the form will be notified by email)
- Implemented the ability to add multiple revised courses on the same form (this comes into play when a quarter course is "broken out" into several semester courses)
- Allowed for a more clean download of the template documents
- Added drop-down of course prefixes in revised info section
- Added default to a standard grading system if one doesn't exist
- Revised the reports to reflex a more complete set of semester data (e.g., Corequisite & Cross Listed Courses)

The Cognos Reports have been revised and are ready for use. The reports will provide departments & colleges the ability to get a complete view of the semester courses offered. Let us know if these reports need to be refined or if additional reports are needed to review your semester courses. We are very open to meeting with departments & colleges to help refine the reports.

What's Coming?

In the next couple of weeks, we will:

- Load users to enable the proxy edit function
- Refine the workflow to enable phase II to begin
- Implements improvements to the search dialog
- Start on the "Program of Study" workflow
