

PDA/Smartphone Information

- AT&T requires the purchase of a data plan with a Smartphone/PDA purchase.
- There is absolutely NO WAY out of an iPhone before the 2-year agreement is up without paying the \$175 early termination fee.
- All of the devices talk to our email server directly except the Blackberrys. A Blackberry will sync with your email, but if you delete an email in your WINGS account, it will not be deleted on your device. However, you can go the other direction. If you delete an email on your device, you will be prompted to select if you want to delete the email on only your device or on both your device and the server.
- All of these devices can be synced with your WINGS calendar.
