

MVITA Executive Luncheon

Tuesday – November 9th, 2010

Tim McCormick - President of Global Gauge Corporation

“How a Small Dayton Company does business in a Big World”

Please join us on November 9th as MVITA hosts an Executive Luncheon featuring a presentation by Tim McCormick, President of Global Gauge Corporation in Dayton, Ohio.

Global Gauge Corporation (GGC) is a local manufacturer of X-ray Thickness Gauges, primarily used for online thickness measurement in steel and rolling mills. At its startup 11 years ago, GGC's prospects were described by a potential investor: "...having poor potential, since you're offering a mature technology in a shrinking market" ...correctly interpreted as: "thanks...but no thanks!".

In the past decade, GGC has succeeded through expansion of its domestic market share, and through international market developments. And the potential for the next decade looks very exciting!

Guest speaker Tim McCormick will explain how GGC's "mature technology" continues to offer growth potential, especially in the emerging Asian markets.

Register Now....don't miss out on this event!
