Computer Troubleshooting & Tips

1. **No power to teaching station:**
   a. Turn on the Master Power switch located within the teaching station (typically at the top right).

2. **Computer not showing an image:**
   a. Computer may not be turned on. Locate computer within the teaching station. Power Button should be indicated with an orange sticker.

3. **Computer not showing an image:**
   a. Make sure the correct input button is pushed on the Video Projector Control Switch (see the “Video Projector Controls” tab for more information).

4. **No sound:**
   a. Try using the computer’s volume control or the manual control on the Video Projector Control Switch.
