1. **No image showing on the projection screen:**

   a. If no lights are showing on the projector control switch, flip on the “Master Power Switch” (in the top right corner).

   b. Make sure the video projector has had 30 seconds to warm up.

   c. Press the “ON” button on the projector control switch.

   d. Check to see that the correct input is selected and matches the equipment you are using.

   e. Try selecting another input and then going back to the one you are using.

   f. Make sure the MUTE button is not in use. If the MUTE button is flashing, press it again to disengage.

   g. If none of these solutions work, call the Help Desk at x4827 from the classroom phone.
