# Android Devices: Connecting to WSU-Secure Wireless Network
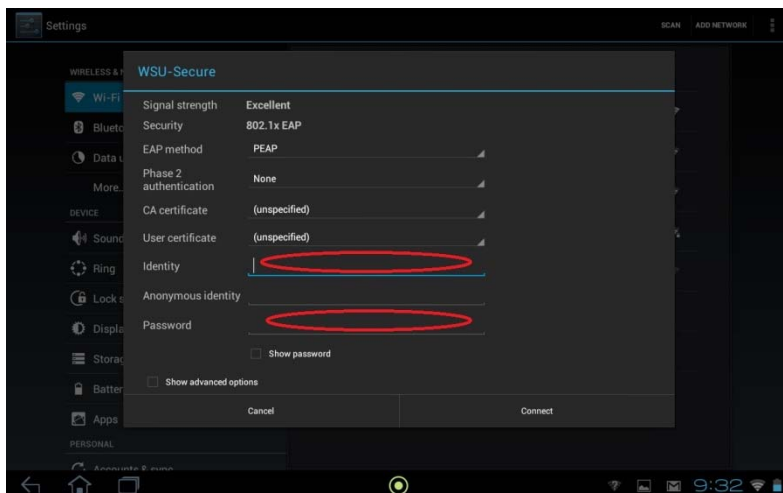

This guide will show you how to use your Android device to connect and authenticate to the WSU-Secure wireless network connection. Please note that there are many versions of the Android operating system, and that these instructions may not match the configuration of your device. If you would like further assistance with connecting your device, contact the CaTS Help Desk at (937) 775-4827.

Connection Instructions

1. Select "WSU-Secure" from your list of available networks/connections.

2. Enter your campus "w" username in the **Identity** field, and your password in the **Password** field.

3. Click **Connect**.
