Good-to-Know Soft Skills: Collaboration

If you are a good workplace collaborator, you are prized by your employer because you are a goal achiever. Effective collaboration is a learned skill to maximize productivity by teaming with others. Don’t confuse collaboration with simple cooperation. Both are positive behaviors, but collaboration is proactive and heavy on taking initiative. Think of bicycle pedals. One pedal does not “cooperate” with the other. Instead, it is an equal push. This is collaboration.

Enhance your ability to collaborate:
1. Know what each team member’s role will be.
2. Have fast and efficient ways of communicating to address key issues.
3. Create a tradition of team members seeking immediate clarification when unsure or unclear about tactics, tasks, or goals.
4. Spot conflicts early, and resolve them before moving forward.
5. Put group goals above an individual member’s personal reward for success. Failure to do so will create hidden agendas and adversely affect communication and lessen your achievements.
6. Good team collaborators are tolerant of each other’s quirks and shortcomings, but when personal behaviors threaten progress, make them a group concern for problem resolution.

Do You Secretly Fear Retirement?

Do you fear retirement? Many people secretly do. They worry about being bored, losing meaning in life that their job provides, having fewer friends, or dying sooner. Good news. Research does not support these fears. On the contrary, retirement usually boosts positive lifestyle changes. You are likely to be more active, sleep better, and reduce your sitting time when you retire. Data revealed that retirees increased their physical activity by 93 minutes a week, decreased sedentary time by 67 minutes per day, increased sleep by 11 minutes per day, and smokers often quit. Sound good? Start planning to get what you want in your golden years.

You may later wonder in your active retirement how you ever had time to work!
Apps for Health and Recovery

Hundreds of apps for wellness, losing weight, mental health, and recovery from addictive disease have arrived on the market over the past several years. Apps run on smartphones and other mobile devices. Many are free or very inexpensive. Recovery apps provide convenient and practical tools to help those recovering from alcoholism track sober time, manage triggers and emotions, find and share 12-step meetings, contact your sponsor discretely, receive daily inspirations, and more. A visit to Googleplay.com or iTunes along with a keyword search for any health-related term will display many choices. Ratings may help find the best app for your need. Follow IMPACT Solutions on LinkedIn and Facebook for more tips!

Standing Up for Millennials

Millennials (Generation Y) include those persons born in the early 1980s to the early 2000s. They've grown up with a larger world view because of the Internet and are the most educated and tech savvy generation in history. Millennials have been raised to feel highly confident, possess a hunger to experience “it all,” have a strong desire to improve their world, are civic-minded, seek social justice, and want to be leaders—78% see themselves as such according to one study. You may notice a new trend of bashing millennials. Don't get caught in this intolerance fad that borders on discrimination. If you find the drive, high expectations, confidence, and strong self-esteem of millennials off-putting, remember that they are seeking happiness with the tools they've been given just like every generation before them.

Increasing Your Intrinsic Motivation

Intrinsic motivation is your inner drive. It is your ability to do something without being prompted by an external or outside stimulus. It is also the ability to act according to the way you think instead succumbing to how you feel at the moment. Thinking you should exercise, for example, and summoning intrinsic motivation to do it instead of slouching on the couch is intrinsic motivation in action. To acquire more of this life-changing behavioral trait, follow these steps: When deciding on a goal, come up with as many “reasons” to do it as possible. This is called finding the “big why.” The more reasons produced, the more urgency you'll feel. Also list positive feelings you have for your success. This will multiply the effect. Break your goal into small pieces to overcome mental resistance to this new behavior. If daily exercise requires getting off the couch to put on running shoes, write it down as a step. If the very next step is putting your hand on a door knob to leave, write it down. This highly conscious process can start you toward having better reflexes to respond immediately to goals with action steps. That old internal debate of “should I or shouldn't I” will diminish or vanish. Practice is the key to developing intrinsic motivation, but acquiring this skill will lead you to the achievements that come from it.
Did you know... IMPACT Solutions offers a Stress Less Center on your EAP website where you can find new tools and strategies for managing stress in one convenient location?

Searching for stress free living? That is a myth. However, we are offering you a chance to understand your personal relationship with stress and increase your control over unexpected stressful events. Doing so will improve your overall life at home with family and friends, at work with coworkers and customers and with people in your community that you deal with on a daily basis.

In addition to the numerous resources on the website, you can call IMPACT Solutions 24/7 at 800-227-6007. A mental health professional is available at all times to provide you with confidential, in the moment support, problem-solving, assessment and identification of resources that can include complimentary face-to-face counseling.

Dealing With Depression

IS IT MORE THAN JUST THE BLUES?

Feelings of sadness are a normal reaction to life events such as a breakup or the loss of a loved one. Even a sad movie or TV show can give us the blues. But people with depression are not able to move past those feelings, and they can last for a long time. Depression is an illness that may require treatment. Your Employee Assistance Program can help with information and resources about depression.

ONLINE SEMINAR
Available on demand starting May 17th

Beating the Blues
We all feel sad sometimes. Get techniques for beating the blues, and learn to recognize the difference between sadness and depression.

Online seminars can be found on your home page, or you can search for them by title.

TOLL-FREE: 800-227-6007
WEBSITE: www.MyImpactSolution.com

Available anytime, any day, your Employee Assistance Program is a free, confidential program to help you balance your work, family, and personal life.
