Senate IT Committee
Meeting Minutes
March 25, 2016

Attendance

Thomas Wischgoll, Sheri Stover, Terri Klaus, Sarah Tebbens, Larry Fox, Kenny Coon, Kathi Herick (sub for Sheila Shellaberger), Shelly Jagow, Steve Berberich, Tom Sudkamp, Michael Stankas

I.   Printing Service
Steve Berberich's office will look into printing volume at nursing to look for solutions for slow printing.
Network printers were planned to be removed after 30 days after finishing the campus-wide transition. So far this was not enforced yet and existing printers that are still under warranty will still be supported until the end of that warranty.
Linux drivers provide only limit feature set. The managed printing service team is aware of the fact that we need to find a resolution to this issues in the future.

II.   Network/Firewall
Sometimes it takes multiple requests to take care of network/firewall changes. CaTS is in the process to change the ticketing system so that we can collect more data to find about where those issues exactly are at.

III.   125 Oelman classroom demo

IV.   Assessment software
The assessment software that was purchased for accreditation purposes (Taskstream) would be of great use to other departments. We should be looking into making assessment software like that available to faculty as well as seek faculty input.

V.   CaTS updates
CaTS would like to make Office 2016 available.
CaTS deployed VDI, a virtual desktop environment, in classrooms. Millett is scheduled for that change this summer. This type of setup is easier to maintain and providing new software will be easier and faster.

VI.   Adjourn.
