Market and performance overview

- The global equity rally staged a modest retreat during the third quarter.
 - Developed-market equities were mixed for the period, while China and Brazil's deep losses sank emerging market equities.
 - U.S. equities generated a quarterly return of 0.58% (as represented by the S&P 500 Index).
 - Within U.S. equities, financials and utilities companies registered strong returns. Meanwhile, industrials and materials companies underperformed other sectors.
 - Small-cap stocks beat large-cap stocks and value stocks outperformed growth stocks.
- U.S. Treasury rates generally increased for the third quarter. However, rates declined across the yield curve in July, then rose in August and accelerated their climb in September.
- The Federal Open Market Committee (FOMC) moved incrementally closer to declaring a start date for tapering, or reducing, asset purchases over the course of the third quarter
 - According to the latest quarterly Summary of Economic Projections, the Federal Reserve's first expected rate hike is 2022 (from 2023 back in June).

Disclosures

Fund / Benchmark Disclosures

The SEI Alternative, Property and Private Assets Funds, with the exception of its structured credit, certain private assets, and energy debt products, are “fund-of-funds”, which means that the funds invest in underlying third party funds. Alternative investments by their nature involve a substantial degree of risk. Investment values and performance information calculated by fund of funds are generally based on investment values reported by the underlying third party funds which may use a number of valuation methods depending on asset class and may provide such valuations on a delayed timeline. For interim reporting, fund of fund valuations are typically estimates and may be subject to later adjustment. The value of investments in the SEI Alternative, Property and Private Assets Funds as presented in this report are calculated pursuant to each fund’s valuation procedures on either a monthly or quarterly basis as described in the Confidential Private Placement Memorandum of each fund. All of the SEI Alternative Funds undergo an annual audit. None of the SEI Alternative, Property and Private Assets Funds, their respective boards, SEI or any of their affiliates will be able to confirm independently the accuracy of the valuations provided by underlying investments or other third parties. Your investment is illiquid, and you may not realize the estimated value of your investment when you attempt to dispose of your investment. The value of investments and performance information for the Alternative, Property and Private Assets Funds provided herein are presented on a monthly or quarterly lag, as noted below, based on the timing of reporting from, or attributable to, the underlying investments.

The SEI Global Private Assets III, L.P. performance is calculated gross of investment management fees and net of administrative expenses and underlying fund expenses. The Fund is valued based upon the most current information available, and may reflect lags of up to 3 months as noted in the report, based on the timing of reporting from, or attributable to, the underlying investments. Returns in this report for the SEI Global Private Asset III Fund reflect the Fund’s value as determined as of the end of the prior quarter, plus cash flows for the current quarter. Therefore, the returns shown here may differ from what the Fund’s actual return will be when its value for the current quarter is calculated. Please refer to the SEI Global Private Asset III, L.P.’s Limited Partnership Agreement and Confidential Private Placement Memorandum for further information regarding valuation.

Disclosures

General Disclosures - continued

The Portfolio Return and underlying holdings performance numbers are calculated using Gross Fund Performance, using a true time weighted performance method (prior to 6/30/2012 the Modified Dietz method of calculation was used). Gross Fund Performance reflects the effective performance of the underlying mutual funds that are selected or recommended by SIMC to implement an institutional client's investment strategy. Gross Fund Performance does not reflect the impact of fund level management fees, fund administration or shareholder servicing fees, all of which, if applicable are used to offset the account level investment management fees the client pays to SIMC. Gross Fund Performance does reflect certain operational expenses charged by the funds and the reinvestment of dividends and other earnings. The inclusion of the fund level expenses that the client incurs but that are offset against the client's account level investment management fees would reduce the gross fund performance of the mutual funds. Alternative, Property and Private Assets performance may be reported on a monthly or quarterly lag.

Any presentation of gross mutual fund performance of underlying mutual fund investments or gross account level performance is only intended for one-on-one presentations with clients and may not be duplicated in any form by any means or redistributed without SIMC's prior written consent.

Through June 30, 2012, annual performance is calculated based on monthly return streams, geometrically linked. From June 30, 2012 onward, annual performance is based upon daily return streams, geometrically linked as of the specified month end.

Performance results do not reflect the effect of certain account level advisory fees. The inclusion of such fees would reduce account level performance, particularly when compounded over a period of years. The following hypothetical illustration shows the compound effect fees have on investment return: For an account charged 1% with a stated annual return of 10%, the net total return before taxes would be reduced from 10% to 9%. A ten year investment of \$100,000 at 10% would grow to \$259,374, and at 9%, to \$236,736 before taxes. For a complete description of all fees and expenses, please refer to SIMC's Form ADV Part 2A, the investment management agreement between SIMC and each client, and quarterly client invoices.

Net Portfolio Returns since 6/30/2012 reflect the deduction of SIMC's investment management fee and the impact that fee had on the client's portfolio performance. Prior to 6/30/2012, Net Portfolio Returns deduct a proxy annual fee for all periods to demonstrate the impact that SIMC's investment management fee had on the portfolio performance. However, this is a hypothetical calculation, as it does not reflect the actual fees paid by the client during the period. Please see your client invoice for actual fees paid.

SEI performance may differ from that of your manager, custodian or consultant due to differences of pricing, valuation and performance methodology.
