2. **Objectives**

   **GE Programs Objectives:**
   a. Sharpen critical thinking skills (critically examining and evaluating ideas)  
   b. Sharpen problem solving skills  
   c. Sharpen communication skills  
   d. Develop ethical and moral awareness  
   e. Develop knowledge of varied cultural dimensions of the human experience  

   **GE Area Objectives – Area VI:**
   Linking general education more closely with study in the major, thereby making more apparent the applicability and transferability of general competencies to specialized study.  

   **Course Objectives and GE Learning Outcomes:**
   This course explores the role and relationship of education in a democracy to concepts of a civil society, social justice, access to knowledge, and development of democratic character in the young.  

   As Thomas Jefferson said, “If a people wish to be free and ignorant, they want something that never was and never will be.” This course explores the essential role that education plays in a free and democratic society. Education is, in large part, responsible for instilling democratic character in the young. Our social, political, and economic democracy depends on a well-educated citizenry to renew
itself and to prosper. Exploring what role education must play in maintaining a vibrant democracy, builds the case for being a lifelong learner with the critical thinking skills necessary to explore “…the aesthetic, ethical, moral, social and cultural dimensions of human experience.” Exploring topics and issues related to the definitions of democracy and applications of education and schooling to the maintenance of a civil society are broad concepts with clear linkages to all five other areas of the GE program. Clearly, education and schooling are purposeful in a society and generally education has an important goal: the preparation of citizens to fully engage in “the human conversation.”

Area six learning outcomes addressed:
Sharpens critical thinking and problem solving skills by critically examining and evaluating ideas. Communication skills are enhanced through discussion and written exploration of course objectives in brief and extended formats.

This course is in Area 6 and will allow anyone wishing to explore the important role that education plays in a democracy to get such an overview. This course can serve as a catalyst for those interested in education to consider a career as a professional educator, or as the foundation for understanding a citizen’s need for a well-educated citizenry in a democracy to assure a civil society.

For WI Course:

The Writing Across the Curriculum (WAC) program at Wright State University has three principal goals:

- to use writing to explore and better understand course content
- to give students opportunities to improve their writing skills
- to introduce students to the different ways writing is used in different fields of study

Faculty teaching ED 210 will use writing assignments to integrate the students’ understanding of reading assignments and class discussions. Students will write brief reaction papers, participate in electronic discussion groups (through e-mail or chat rooms), and write position papers. The majority of the course grade will be determined by faculty evaluations on some or all of the following written assignments: reaction papers, essays, journal entries, small group discussions held online, essay exams, and position papers.
