Please log in to your ATIXA Event Lobby each day to access the course slides, supplemental materials, and to log your attendance.

The ATIXA Event Lobby can be accessed by the QR code or visiting www.atixa.org/atixa-event-lobby in your internet browser.

Links for any applicable course evaluations and learning assessments are also provided in the ATIXA Event Lobby. You will be asked to enter your registration email to access the Event Lobby.

If you have not registered for this course, an event will not show on your Lobby. Please email events@atixa.org or engage the ATIXA website chat app to inquire ASAP.
Title IX Coordinator and Administrator Four: Advocacy, Prevention, and Trauma

Training & Certification Course
Any advice or opinion provided during this training, either privately or to the entire group, is **never** to be construed as legal advice. Always consult with your legal counsel to ensure you are receiving advice that considers existing case law, any applicable state or local laws, and evolving federal guidance.
CONTENT ADVISORY

The content and discussion in this course will necessarily engage with sex- and gender-based harassment, discrimination, and violence and associated sensitive topics that can evoke strong emotional responses. ATIXA faculty members may offer examples that emulate the language and vocabulary that Title IX practitioners may encounter in their roles including slang, profanity, and other graphic or offensive language.
AGENDA

1. Climate Surveys
2. Prevention Methodologies
3. Prevention: The 8 Cs
4. VAWA Section 304 Prevention Programming
5. Specific Programs, Strategies, and Initiatives
6. Presentation Skills
AGENDA

7  Neurobiology of Trauma
8  Trauma-Informed Intake and Interviewing
9  Title IX and BIT
10 Victim Advocacy
TITLE IX NOTICES OF PROPOSED RULEMAKING 2022 & 2023
TITLE IX REGULATIONS

- **1972:** Congress passed Title IX of the Education Amendments
- **1980:** the Department of Education’s Office for Civil Rights (OCR) given primary responsibility for enforcing Title IX
- **November 2018:** OCR proposed the most detailed and comprehensive Title IX regulations to date, which focused on sexual harassment response
- **August 2020:** Significantly amended, due-process oriented Regulations took effect (proposed in Nov. 2018)
- **June 2022:** OCR published a Notice of Proposed Rule Making (NPRM) outlining proposed changes to the Title IX regulations focused on sexual harassment response and pregnancy and related conditions
NPRM PROCESS TIMELINE

- **July 2022:** NPRM published in the Federal Register and the 60-day public comment period began

- **September 2022:** Review and comment period ended
  - Received 240,000+ comments

- **April 2023:** OCR published a separate NPRM outlining proposed changes to the Title IX regulations focused on gender identity and athletic participation; 30-day public comment period
  - Received 150,000+ comments

- **October 2023:** Anticipated publication of both the sexual harassment and athletics Title IX Final Rules

- **OCR has not yet announced an implementation deadline or timeline for either set of new regulations.**
PREPARING FOR IMPLEMENTATION

- Continue to fulfill obligations under the current regulations for the start of the 2023-2024 academic year.

Steps to Take Now:

- Educate yourself on the proposed regulations
- Prepare to educate your community on the changes
- Identify stakeholders that will need to be involved in making policy decisions (e.g., whether to have hearings)
- Determine how you will manage policy changes
- Plan for the training needs for your community
- Consider state laws, court decisions, and other regulations that may affect your institutional approach
JUST A HEADS UP....

- Use of Humor
- Victim/Survivor/Reporting Party/Complainant
- Gendered Pronouns
- Prevention Terminology
- Content Warning
Climate Surveys

- What is a Climate Survey?
- Implementing Climate Surveys
- Leveraging the Collected Data
DIKW PYRAMID

Each step up the pyramid answers questions about and adds value to the initial data.

DATA

A collection of facts in a raw or unorganized form

Source: https://www.ontotext.com/knowledgehub/fundamentals/dikw-pyramid/
Data that is easier to measure, visualize & analyze for a specific purpose

Source: https://www.ontotext.com/knowledgehub/fundamentals/dikw-pyramid/
KNOWLEDGE

Source: https://www.ontotext.com/knowledgehub/fundamentals/dikw-pyramid/
DIKW PYRAMID

Information
The analysis of the data into understandable information and trends.

Knowledge
What this data means for the field and your institution or district.

Wisdom
Your team makes decisions about how to apply the knowledge and make changes that are best for you.
CLIMATE SURVEYS

Defining Climate Surveys
10-20 minute survey that participants complete to share their perspective with those conducting the research.

Opportunity
Climate surveys should be seen as something we *get to do* not something we fear.

Purpose of Climate Survey
Climate surveys are designed to better understand the community’s experience with sexual assault, stalking, and IPV.

Use of Data
Climate survey results shed light on areas that need improvement and allow for informed decision making.
Each survey group would have slightly different questions useful to assess the particular group’s experience with sexual assault, stalking, and IPV.

For example, faculty or teacher surveys could better assess how they feel about sharing information with the Title IX office as mandatory reporters.
CLIMATE SURVEY PROCESS

- Development
- Implementation
- Analysis
As required by the 2022 VAWA Reauthorization, the Secretary of Education shall develop, design, and make available through a secure and accessible online portal, a standardized online survey tool regarding postsecondary student experiences with domestic violence, dating violence, sexual assault, sexual harassment, and stalking.

The survey tool shall be fair and unbiased, be scientifically valid and reliable, meet the highest standards of survey research, and notify the participant that anonymized results of the survey may be published.

The survey must be accessible for individuals with disabilities.
Questions shall be designed to gather information on student experiences with domestic violence, dating violence, sexual assault, sexual harassment, and stalking, including the experiences of victims of such incidents.

Questions will include:
- optional demographic information
- incidence and prevalence of domestic violence, dating violence, sexual assault, sexual harassment, and stalking
- students’ awareness of related institutional policies and procedures
▪ what response was received, what actions were taken, and the outcome of the matter if a victim reported an incident to different entities
▪ contextual factors, such as whether force, incapacitation, or coercion was involved
▪ institutional affiliation of the Respondent, if any
▪ whether a victim reported an incident to Federal, State, local, Tribal, or campus law enforcement
▪ the impact of domestic violence, dating violence, sexual assault, sexual harassment, and stalking on the victim’s education
▪ the impact and effectiveness of prevention and awareness programs and complaints processes
▪ attitudes toward sexual violence and harassment, including the willingness of individuals to intervene as a bystander
▪ other questions, as determined by the Secretary of Education

▪ An institution of higher education may request, at no cost to the institution, to add additional questions that would increase the understanding of the institution climate factors unique to the campuses affiliated with the institution.
Beginning not later than **one year** after the date on which the survey tool is available, and **every two years** thereafter, each institution higher education that receives Federal educational assistance shall administer the survey.

Each institution shall publish, in a manner that is readily accessible and usable by individuals, including individuals with disabilities—

- the campus-level results of the standardized elements of the survey
- the campus-level results of the additional elements modifying the survey by the institution, if any, on the website of the institution
DEVELOPMENT – ADDITIONAL QUESTIONS OR TOOLS

▪ Institutions should consider whether and how often employees should be surveyed, as well as whether additional questions should be added to the government-developed survey tool

▪ It’s imperative to not rush this part of the process to get to good results.

▪ Institutions have many options when it comes to the development of additional or supplemental survey tools:
  ▪ Look to government examples
  ▪ Create a homegrown survey with support from those with research experience within the institution
  ▪ Work with a third-party company like TNG, ATIXA’s management organization
Surveys can be designed in a variety of ways. Generally, it is advisable to follow these guidelines:

- Keep it a reasonable length; otherwise, people won’t take the time to complete it or won’t give accurate answers to complicated questions.
- Design the survey with a focus on how the results will be reported. Write questions to fill in the report.
- Use a mixed model design to capture both qualitative and quantitative data.
The first step in the development of a climate survey is understanding who is participating in the survey.

Demographic questions provide the ability to break down results into additional categories for analysis and comparisons.

However, demographic questions cannot be added retroactively. So, make sure to create the questions in the survey before moving from development to implementation.
IMPLEMENTATION

- The challenge is getting the survey in the hands of the population being assessed.
- Ways to survey:
  - Waiting rooms or lobbies
  - Orientation events
  - Sports practices or club/organization meetings
  - Homerooms
- Types of surveys:
  - Online with internal survey tools or Survey Monkey
  - Pen and paper
  - Tablet/laptop based
IMPLEMENTATION (CONT.)

- Develop a plan that involves a variety of options to maximize responses.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low response rate</td>
<td>Pick a slower time of the year to survey. Ensure students have enough time and energy to complete. Send reminder emails with three to four opportunities over a month to complete.</td>
</tr>
<tr>
<td>Start but don’t finish</td>
<td>Some software can track people who start but don’t finish. Consider reducing survey length and detail of questions. Are there common problem areas at which people are stopping?</td>
</tr>
<tr>
<td>Low online response</td>
<td>Find times when students are in one place like classes/orientations to up the survey response.</td>

</table>

ANALYSIS

- Make sure the person or group performing the analysis has the experience necessary to do it well.

- That being said, more detailed statistics (e.g., correlative analysis, ANOVA, or advanced design) are often not needed. Simple summary percentages of the response rate can typically provide rich and meaningful data.

- The analysis should provide a story for the data. This story should be easily understood and shed light on areas of further exploration. Overly complicated analysis and data presentation should be avoided.
SAMPLE QUESTIONS

- Employee classification: (e.g., faculty, administrative support, teacher, administrator, cabinet-level)
- Employment status: full-time, part-time
- Age range: 18–20, 21–24, 25–34, 35–44 (may be more helpful to use grades for K-12 students and age ranges for teachers, college students, and faculty/staff)
- Gender: male, female, transgender, intersex, non-binary, other [optional: please list], prefer not to answer
- International student? Athlete? Fraternity or sorority member?
One area of innovation ATIXA has been pushing forward is targeted questions to see how individuals understand the existing sexual assault, harassment, stalking, and intimate partner violence policy.

This involves a survey question with an embedded link asking first if the individual is familiar with the policy and then asking them more specifics about the policy being fair to the Respondent, the Complainant, and its application to the school.

Consider asking questions that incorporate other aspects of gender equity (e.g., pregnancy, LGBTQIA+) if appropriate.
Experience and perception questions should make up the bulk of the survey. They are designed to gain a better understanding of the participants’ experience with sexual violence. Questions can focus on personal observation, personal experience, and general perception.

This is an ideal area to ask more open-ended questions (always remembering that these are harder to analyze) to better understand the participants’ experience and perception of policy and implementation at the school.
SAMPLE QUESTIONS

If I were a victim of gender-based violence, I would feel most comfortable reporting to the following campus or school resources (Check all that apply):

- Licensed counselor
- Academic Advisor
- Title IX coordinator/Title IX advocates
- Faculty member or teacher
- University police or SRO
- Resident Advisor (RA)
- Student health staff or school nurse
- Student affairs administrator(s)
- Principal/Assistant Principle
- Housing and residence life staff
- Academic deans/vice presidents
- Athletics coach
- Campus ministry staff
SAMPLE QUESTIONS (CONT.)

- Have you ever attended any school programs/trainings that addressed the prevention of gender-based violence (e.g., interactive theater, lectures, classroom talks, orientation programs)?
  - Yes
  - No

- How can the school improve its programming/training pertaining to gender-based violence? (open-ended.)
CLIMATE SURVEY RESULTS

- As mentioned earlier, reports must be readable and practical above all else. There is a temptation to use fancy charts and statistical analysis that may overly complicate the story the report needs to tell.

- Data should shed light on areas to be further explored or addressed. Survey results should provide a roadmap to improve and better existing prevention education.

- Results should not be seen as overly critical; no school does this perfectly, and there is always room for improvement.
CLIMATE SURVEY RESULTS EXAMPLES

- Of those responding, 25% are first-year and sophomore students, 28% juniors, 18% seniors, and 4% graduate and post-graduate students.
- 98% are full-time enrolled students between the age ranges of 18–20 (64%), 21–24 (32%), and 25 and older (4%).
- 70% of the Participants are women.
- 20% of the Participants are student athletes.
- 45% of the Participants are involved in fraternity and sorority life.
- 82% of the Participants are involved in a student organization.
- 16% of the Participants transferred from another institution.
60% of responding students feel the college does enough to prevent gender-based violence.

An additional 22% of participating students were neutral in responding to this question.

It’s likely that students who responded to this question neutrally would respond more favorably if they were more aware of the university’s efforts to prevent this type of violence.
Close to 40% of students are unsure of where to find information about campus resources for victims of gender-based violence, and 46% of students are unfamiliar with the college’s bystander policy. Of note, only 37% of students reported that campus resources were covered in gender-based violence programs offered on campus. Further education to the community would be helpful to reduce the percentage of students who are unaware of campus resources for victims.
If students in the survey become victims of gender-based violence, they are most likely to report this to the counseling center (70%) or the police (50%). Only 8% said they would report gender-based violence to the Title IX Coordinator. This is likely another area of education for students, who need to better understand their reporting options. Also, this finding highlights the importance of cultivating a close working relationship among the police department, counseling staff, and the Title IX Coordinator.
Prevention Methodologies
While much time and attention is spent on how to best respond to notice of Sexual Harassment/Stalking/Sexual Violence taking place, we spend too little time exploring how to prevent these behaviors in schools, on campuses, and online.
The first key to prevention is recognition.
  - Bystander intervention example

There are many ways that Sexual Harassment/Stalking/Sexual Violence can manifest, but rarely does it do so in isolation.

The context is one of an entire continuum, including bullying and stalking.

Let’s explore a graphical representation of the concept…
CONTINUUM OF SEXUAL/SEX-BASED DISCRIMINATION

Sexual Harassment
- Objectifying, gender-focused jokes, sexual comments, bullying, and vulgar pictures
- Seductive behavior and inappropriate advances

Sexual Assault
- Threats, blackmail, sexual bribery, and stalking (pre-attack)
- Physical force, sexual fondling, rape, IPV, and stalking (post-attack)

- Touching, pinching, and groping
SEXUAL ABUSE CONTINUUM

- Sexist jokes
- Sexual objectification
- Jealousy
- Minimizing partner’s feelings and needs regarding sex
- Criticizing partner sexually
- Unwanted touch
- Withholding sex and affection
- Sexual labels like “whore” or “frigid”
- Always demanding sex
- Forcing partner to commit humiliating sexual acts
- Cheating
- Forcing partner to watch sexual acts with others
- Demanding sex with threats
- Forcing sex
- Forcing sex with others
- Forcing uncomfortable sex
- Forcing sex after beatings
- Sadism
PREVENTION METHODOLOGIES

Prevention is...

- Integrated across disciplines and therefore collaborative
- Holistic and address multiple areas of wellness (physical, emotional, spiritual, intellectual, etc.)
- Evidence based and/or able to demonstrate efficacy
- Strategic in design and implementation
- Multi-targeted, directed at the individual, the community, and the society/environment
Primary prevention aims to prevent the harm *before* it ever occurs.

Secondary prevention targets a problem that already exists; often immediately after injury has occurred.

Tertiary prevention provides treatment and longer-term remedies when harm has already occurred.

Reduces the prevalence and occurrence of sexual violence, gender-based violence or discrimination

Provides short-term remedies to minimize the impact of the incident and address consequences of the harm

Addresses lasting or longer-term responses for those already impacted by the incident
Primary

- Bystander Intervention
- Programs teaching healthy and respectful relationships
- Risk-reduction programming
- Programs addressing men’s role in preventing sexual violence
- Discussion groups with populations with high-risk of perpetration
- Social norming campaigns

Secondary

- Interim remedies and victim services
- Deterrence-based programs
- Awareness programming — Take Back the Night, etc.
- Social norming campaigns (can be primary or secondary depending on focus)

Tertiary

- Remedies for victims
- Offender treatment services
- Policies and procedures to address sexual violence
- Support groups and long-term remedies
The Spectrum of Prevention is a “systematic tool that promotes a multifaceted range of activities for effective prevention.”

Identifies multiple levels of prevention across systems, moving beyond the idea of prevention as individual education only

http://www.preventioninstitute.org/component/taxonomy/term/list/94/127.html

Prevention requires understanding the factors that influence violence.

The Socio-Ecological Model presents a framework for better understanding violence and the effect of potential prevention strategies.

Considers four levels – individual, interpersonal, community, and society – and the complex interplay between them, which creates a range of risk factors for violence.
SOCIOECOLOGICAL FRAMEWORK

- Society
- Community
- Interpersonal
- Individual
Prevention: The Eight C’s

- Cogent
- Community-wide
- Collaborative
- Consistent
- Compliant
- Comprehensive
- Centrally-planned
- Culturally Competent

Note: The Eight C’s are copyrighted to TNG, LLC.
① COGENT (CONT.)
2 COMMUNITY-WIDE
MANDATED PROGRAMMING

**Negative Consequence**
A mandate with a negative consequence is often easier to create, administer, and enforce.

Examples:
- Hold placed on registration
- Bumped to the bottom of the housing request pool
- Parking limited to a specific, inconvenient lot

**Positive Consequence**
A positive mandate is more developmental, and students may have better learning outcomes.

Examples:
- Free tickets to the homecoming game
- Counts toward 3 of their required programming
- Parking pass to a premier lot
③ COLLABORATIVE
④ CONSISTENT
⑤ COMPLIANT
6 COMPREHENSIVE

- **Wellness Education**
  - Bystander Intervention
  - Social Norming
CULTURALLY COMPETENT
UNIQUE CONSIDERATIONS

- Populations:
  - Male complainants
  - Complainants from historically marginalized groups/communities
  - LGBTQIA+ complainants
  - Minors
  - International parties
  - Parties with disabilities
  - Parties with histories of mental health issues
  - Complainants of drug-facilitated assaults
  - Complainants of repeat assaults
UNIQUE CONSIDERATIONS (CONT.)

- Underreporting
- Stereotyping
- Internalized and/or institutionalized bias/prejudice
- Lack of informed, available services
VAWA Reauthorization 2013 – Section 304: Prevention Programming

- Regulations repeatedly reference varying forms of programming, education, and initiatives targeting Sexual Assault, Domestic Violence, Dating Violence, and Stalking, such as:
  - Primary prevention programs
  - Ongoing prevention and awareness programming and campaigns
  - Risk factors, protective factors, and risk reduction
  - Programming that changes behavior and social norms
  - Programming that increases understanding and skills
VAWA EDUCATIONAL PROGRAMS AND CAMPAIGNS

- Description of Programs
- Traits of Effective Programs
- Primary Prevention
- Awareness Programs
- Incoming Students and New Employees
- Prohibiting the VAWA Offenses
- Bystander Intervention
- Risk Reduction
- Ongoing…
The Handbook for Campus Safety and Security Reporting (2016) was rescinded and replaced by the Clery Act Appendix for FSA Handbook in October 2020.

- The 2016 Handbook included detailed information for implementing the 2013 VAWA amendments to the Clery Act regulations.
- The 2020 Handbook does not include this information.
- ATIXA recommends following the guidance in the 2016 Handbook until replacement guidance is issued.
ASR Statement must include:

- A description of the institution’s educational programs and campaigns to promote the awareness of dating violence, domestic violence, sexual assault and stalking.

- A description of the institution’s primary prevention and awareness programs for all incoming students and new employees.

- A description of the institution’s ongoing prevention and awareness campaigns for students and employees.

Programming should include information on risk reduction and must not be presented in a manner that encourages victim blaming.
Programs should be tailored to each institution and its constituents and be:

- Culturally relevant
- Inclusive of diverse communities and identities
- Sustainable
- Responsive to community needs
- Informed by research or assessed for value, effectiveness or outcome (i.e., research conducted according to scientific standards and efficacy assessments performed by institutions and organizations)

- Consider environmental risk and protective factors as they occur in the individual, relationship, institutional, community, and societal levels. (8-3)
VAWA: EDUCATIONAL PROGRAMS AND CAMPAIGNS (CONT.)

“Incoming Students”
- First-year students
- Transfer students
- Student-athletes
- International students
- Graduate students
- Professional students
- Online students
- Others?

“New Employees”
- Full-time
- Part-time
- Faculty – all levels
- Staff
- Administrators
- Union and non-union
- Student employees:
  - RAs, TAs, GAs…
- Others?
TRAIINEE POPULATIONS

- **Title IX Compliance Staff.** e.g., Coordinator and Deputies, Investigators, hearing boards (including appeals), and others involved in processing, investigating, or resolving complaints

- **First Responders.** e.g., RAs, health center employees, counselors, sexual assault response coordinators, academic advisors, and public safety

- **All Faculty & Staff; ATIXA Mandatory Reporters.** ATIXA recommends making all faculty and staff mandatory reporters.

- **All Students**
  - Undergraduate, graduate, professional, distance, and online, etc.
TRAINING COORDINATION AND OPERATIONALIZATION

- Centralization and oversight of school-wide efforts
- How?
  - In person? Online? Classroom?
  - Administrator-driven? Peer-driven?
- When/how often?
- Orientation: new student, transfer student, new faculty/teachers, and staff
  - Follow-up is crucial
- Ongoing prevention and awareness campaigns
  - Programs, conversations, speakers, hall and floor meetings, first-year seminar, third-party online training, etc.

GROUP ACTIVITY

- Planning Your Prevention Year
Specific Programs, Strategies, and Initiatives

- Perpetration-focused Prevention
- Environmental Management
- Social Norms/Normative Marketing
- Bystander Empowerment
- Awareness Initiatives
WHAT WORKS?

1. Perpetration-focused prevention

2. Environmental management
   - Community/campus partnerships
   - Reducing the locus of harm

3. Social norms/normative marketing
   - If pluralistic ignorance exists and can be remedied, behavioral changes can result
   - If false consensus exists and can be dispelled, it can result in behavioral changes

4. Bystander empowerment

5. Skills for preventing sexual violence
RISK AND PROTECTIVE FACTORS

- **Risk factors** are linked to a greater likelihood of sex- or gender-based violence perpetration.
- They are contributing factors and might not be direct causes.
- Not everyone who is identified as at risk becomes a perpetrator of violence.
- A combination of individual, relational, community, and societal factors contribute to the risk of becoming a perpetrator of sex- or gender-based violence.
- Understanding these factors can help identify various opportunities for prevention.
- Institutions too often rely on prevention programming focused on protective factors to prevent victimization rather than addressing risk factors for perpetration.

Adapted from: [https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html](https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html)
RISK FACTORS FOR SEX- OR GENDER-BASED VIOLENCE PERPETRATION

**Individual Risk Factors**
- Alcohol and drug use
- Delinquency
- Lack of concern for others
- Aggressive behaviors and acceptance of violent behaviors
- Early sexual initiation
- Coercive sexual fantasies

**Risk Factors for Sex-or Gender-Based Violence Perpetration**
- Preference for impersonal sex and sexual-risk taking
- Exposure to sexually explicit media
- Hostility towards women
- Adherence to traditional gender role norms
- Hyper-masculinity
- Suicidal behavior
- Prior sexual victimization or perpetration

Adapted from: https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html
RISK FACTORS FOR SEX- OR GENDER-BASED VIOLENCE PERPETRATION

Relationship Factors

- Family history of conflict and violence
- Childhood history of physical, sexual, or emotional abuse
- Emotionally unsupportive family environment

- Poor parent-child relationships, particularly with fathers
- Association with sexually aggressive, hypermasculine, and delinquent peers
- Involvement in a violent or abusive intimate relationship

Adapted from: https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html
RISK FACTORS FOR SEX- OR GENDER-BASED VIOLENCE PERPETRATION

**Community Factors**
- Poverty
- Lack of employment opportunities
- Lack of institutional support from police and judicial system
- General tolerance of sexual violence within the community
- Weak community sanctions against sexual violence perpetrators

**Societal Factors**
- Societal norms that:
  - support sexual violence
  - support male superiority and sexual entitlement
  - maintain women’s inferiority and sexual submissiveness
- Weak laws and policies related to sexual violence and gender equity
- High levels of crime and other forms of violence

Adapted from: https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html
PROTECTIVE FACTORS FOR SEX- OR GENDER-BASED VIOLENCE PERPETRATION

- **Protective factors** may lessen the likelihood of sex- or gender-based violence victimization or perpetration.
  - These factors can exist at individual, relational, community, and societal levels.

- **Examples:**
  - Families where caregivers work through conflicts peacefully
  - Emotional health and connectedness
  - Academic achievement
  - Empathy and concern for how one’s actions affect others

Adapted from: https://www.cdc.gov/violenceprevention/sexualviolence/riskprotectivefactors.html
ENVIRONMENTAL MANAGEMENT

- Embraced by the National Institutes of Health and Centers for Disease Control and Prevention
- Many applications to alcohol, mental health, and suicide
- Not as much application to sexual assault, harassment, stalking, etc., to date. Studies are in progress.
  - *Sexual Citizens* by Hirsch and Khan
    - “Designing spaces and policies that moderate rather than augment existing power inequalities is essential to sexual assault prevention.”
- Approach: Addressing abusive/problematic organizations, improving safety, establishing and consistently applying policies, reducing alcohol and other drug issues on campus, addressing community-level risks through environmental approaches
Normative marketing is based on the concept that people’s behavior is influenced by what they think is “normal” or “typical.”

The problem is that people often misperceive what is “normal” or “typical.”

Social normative marketing strategies aim to provide accurate data about what the majority of others actually do.
NORMATIVE MARKETING (CONT.)

▪ Actions are often based on misinformation about or misperceptions of others’ attitudes and/or behavior.

▪ When misperceptions are defined or perceived as real, they have real consequences.

▪ Individuals passively accept misperceptions rather than actively intervening to change them, hiding from others their true perceptions, feelings, or beliefs.

▪ Appropriate information about the actual norm will encourage individuals to express those beliefs that are consistent with the true, healthier norm, and inhibit problem behaviors that are inconsistent with it.

▪ For a norm to be perpetuated, it is not necessary for the majority to believe it, but only for the majority to believe that the majority believes it
NORMATIVE MARKETING (CONT.)

- Low entry cost, and relatively high entry energy
  - Target risky behaviors
  - Survey norms and targeted healthy norms
  - Share those norms with the community
  - Evaluate

- Posters, restroom stalls, emails, and e-banners to disseminate information

- Data can be integrated into classes

- “Put some spinach in the smoothies.” – Dr. Chris Linder
What unhealthy norms exist within our communities that we could use to reprogram norms specific to sexual violence, stalking, IPV, and sexual harassment?

- Women don’t mind sexual harassment
- Men don’t care how sexual harassment by other men makes women feel about them
- Men aren’t bullied, harassed, or assaulted
- Showing respect for women is a sign of weakness
- Others
SAY WHAT THE REST OF US ARE THINKING

Really?! That's not funny

Most Berkeley grad students would challenge a sexist joke

#WeCARE
Data: 2018 UC Berkeley MyVoice Survey

PATH to Care Center
care.berkeley.edu
95% of NAU students would not have sex with someone who’s drunk.
NAU Campus Climate Survey, 2019
N = 2541

92% of NAU students would CONFRONT a friend who hooked up with someone that didn’t give consent.
NAU Campus Climate Survey, 2019
N = 2541
Bystander Intervention

- Think back to sexual assault prevention from the 90s and early 2000s....
  - Educating young women to watch their drinks and travel in groups
  - Know your surroundings and always have a backup plan to call for help
  - Rape whistles, pepper spray, tasers
  - Training in self-defense
Shift to....
BYSTANDER INTERVENTION (CONT.)

- Shifting the onus of preventing rape from the victim and to the community and the perpetrator
- Focus on fixing the problem rather than teaching women to not become victims
- Creating safe places to gather; the community is collectively responsible for maintaining a safe environment
- Community is encouraged to address inappropriate behavior by not tolerating sexist jokes, misogynistic behavior, etc.; and is trained in intervening when there are at-risk behaviors present
Kitty Genovese
- In 1964, Kitty Genovese was stabbed, robbed, sexually assaulted, and murdered.

Bystanders
- It happened on the street, in public
- It went on for 30 minutes
- 37 witnesses heard her and saw her

Latane & Darley
- Bystander Effect
- Conducted experiments to understand why people didn’t intervene

BYSTANDER INTERVENTION (CONT.)

A bystander is anyone who observes a dangerous or potentially dangerous situation

- The Bystander Effect occurs when an individual chooses not to act
  - Diffused responsibility
  - Pluralistic ignorance

- Bystander Intervention involves engaging community members in reducing, stopping, or preventing behavior that is harmful.

Bystander Intervention (Cont.)

A positive bystander and prevention model takes a wider, community-based approach that shifts cultural norms and expectations of behavior rather than simply targeting individuals as potential victims or perpetrators.

Barriers to helping...
- Believe others think the behavior is okay
- Afraid to act in a way that is socially unacceptable
- Believe it is “not our business”
- Believe someone else will help
- Not in tune with surroundings
- Not sure what to do

Encouragers to helping...
- Creation of a culture that values respect, helping others, wellness, empowerment, etc.
- Training on red flags and what to look for to identify a problematic situation
- Development of a community approach to responsibility
- Having the confidence and ability to know how and when to intervene
BYSTANDER INTERVENTION (CONT.)

Can be used to address...

Sexual Harassment
- Objectifying, gender-focused jokes, sexual comments, bullying, and vulgar pictures
- Seductive behavior and inappropriate advances

Sexual Assault
- Threats, blackmail, sexual bribery, and stalking (pre-attack)
- Physical force, sexual fondling, rape, IPV, and stalking (post-attack)
- Touching, pinching, and groping
## BYSTANDER INTERVENTION – BUILD IT OR BUY IT?

### Build it Pros
- Better content control
- More tied to institutional communality and standards
- Cheaper
- Easier to update and alter
- Easier referral to services and departments on campus
- Potential for higher stakeholder buy-in

### Build it Cons
- Time consuming
- Garbage in = Garbage out
- Potential for splintering of mission goals
- Reactive rather than strategic prevention effort
- Lack of content expertise
- Lack of research expertise
- Bias and blind spots
# BYSTANDER INTERVENTION – BUILD IT OR BUY IT? (CONT.)

<table>

<tr>
<th>Buy it Pros</th>
<th>Buy it Cons</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ Program in a box</td>
<td>▪ Higher cost</td>
</tr>
<tr>
<td>▪ Easy to implement</td>
<td>▪ Potential for harsh audits of services</td>
</tr>
<tr>
<td>▪ They will use school graphics and links</td>
<td>▪ May follow a one-size-fits-all approach, lack of customization</td>
</tr>
<tr>
<td>▪ Annual research reports</td>
<td>▪ Multi-year contract lock in required</td>
</tr>
<tr>
<td>▪ Conferences and training opportunities for staff</td>
<td></td>
</tr>
</tbody>
</table>
STEP UP!

5 DECISION MAKING STEPS

1. Notice the event.
2. Interpret the event as a problem — investigate!
3. Assume personal responsibility.
4. Know how to help.
5. Implement the help: Step UP!

- Gives a clear example of how bystander intervention should work.

INCORPORATING CYBER SEXUAL ABUSE BEHAVIORS

- Non-consensual pornography
  - intimate photos or videos taken without consent
  - consensual intimate photos or videos distributed without consent

- Upskirting
  - snapping sexually intrusive photos, often of someone’s genitals, without their knowledge

- Sextortion
  - form of blackmail in which sexual information or images are used to extort
Cyber sexual abuse is both more misunderstood and more tolerated both in society and by victims.

- Photos and videos can be altered.
- Research around technology-based violations is limited and new.
- Images may be posted with victim’s contact information, inciting further harassment (“doxxing”).
- Most images are authored by their victims, meaning they retain ownership rights.
Possibly increased vulnerability due to:
- Growing role of technology in daily life
- Expanding digital histories

Address technology hygiene
- Password strength/two-factor authentication
- Device passcodes and remote wiping
- Not sharing accounts
- Public Wi-Fi concerns
- Social media account privacy
  - Friends tagging posts
  - Searchability
  - Location

Source: [http://www.stopstreetharassment.org/2016/02/addressing-revenge-porn/](http://www.stopstreetharassment.org/2016/02/addressing-revenge-porn/)
PRESENTATION SKILLS

- Strategies for Developing and Delivering Strong Presentations
PRESENTATION SKILLS

- Being able to deliver material in an effective manner is critical to having the audience understand and digest the material.

- This means programs should be interesting, hold the audience’s attention, and challenge their perspectives.

- Having solid, researched-based content is not sufficient. Delivering content in a way that is effective for a given group is essential.
DEVELOPING A MARKETING STRATEGY

Auditence
01
Who is the audience?

02
Content
What does this specific audience need to know?

03
Format
What is the best way to reach them?

04
Buy-In
How do I get participation from them?
PRESENTATION SKILLS (CONT.)

Don’t

▪ Antagonize the audience or put them on the defensive
▪ Use jargon or language unfamiliar to the audience
▪ Rely on scare tactics, use victim blaming language, or bash men.
▪ Take offense to or get thrown off by tough questions

Do

▪ Begin by building rapport and connecting with the audience
▪ Appeal to attendees’ humanity and allegiance to your community
▪ Use humor to poke fun at outdated norms related to dating and sex
▪ Make your message digestible
▪ Use multiple modalities
PRESENTATION SKILL DO'S

▪ Use multiple methods of delivery
▪ Be confident, patient, and graceful
▪ Be aware of time, technology, and space restrictions
▪ Address any elephant in the room issues
▪ Tread carefully on “third rail” issues
▪ Understand the audience’s motivation for attending and the context of how they see the material
▪ Write programs that address cultural, generational, sexual orientation, gender, and racial/ethnic differences
PRESENTATION SKILL DON'TS

- Have great material and information and over-focus on content while neglecting delivery
- Lecture the entire time or read off of slides
- Allow too many questions that disrupt flow
- Lose your cool and over-engage with topic
- Speak over or “hog the mic” when co-presenting
- Run over time
- Embarrass or shame participants
- Fail to plan for unanticipated technology issues
TRAINING RESISTANT OR DISRUPTIVE INDIVIDUALS

- What kind of resistant or disruptive trainees have you encountered?

- Tips for Responding:
  - Take a breath, respond with understanding, grace, and confidence – not defensiveness or anger
  - Find common ground when you can
  - Redirect and constructively correct or guide in a more productive direction
  - When disruptive, rude, inappropriate, etc., stop the behavior/comments, disengage, and move on
PRESENTATION SKILLS FOR SPECIAL POPULATIONS

- Orientation and first-year populations
- Mental health needs
- Non-traditional students
- Graduate and professional students
- Commuters
- Minors (high school students on campus)
- Student organizations
- Student-athletes
- International students
- Captive and mandated programming
TRAIN THE TRAINER

An expert staff member teaches a group of trainers the content AND how to teach it.

The newly trained trainers observe the training, then practice teaching it in front of expert staff and other trainers.

The group of trainers deliver the training to the community.
TRAIN THE TRAINER (CONT.)

Pros

▪ Helps leverage limited resources
▪ Peer-based education is often better received
▪ Gains buy-in across the community

Cons

▪ If trainers aren’t well-trained, can go poorly
▪ Increases staff time spent on hiring, training, and supervising the trainers
▪ Turnover rates in trainers
CASE STUDY VIGNETTES: TRAINING RESISTANT OR DISRUPTIVE INDIVIDUALS
Neurobiology of Trauma

- Introduction to Trauma
- Neurobiological Impact of Trauma
- Considerations for Interviewing
ATIXA POSITION STATEMENT

- Worry that application of the knowledge obtained by practitioners in our field has gotten way ahead of the actual science
- The body of knowledge is being misapplied
- Some purveyors of this knowledge are politically motivated to extrapolate well beyond any reasonable empirical conclusions currently supported by the science
- The field needs to incorporate trauma-informed investigation and interviewing methods into its best practices, provided that they do not compromise the ability to obtain credible, relevant evidence
However, the “Neurobiology of Trauma” should not significantly influence the way that colleges and schools evaluate evidence.

We can be trauma-informed in our investigations without allowing trauma to unduly influence our interpretation of evidence.

Wise administrators are vetting their training materials for potential indications of bias to ensure the best possible defense to a claim of a biased resolution process.

Not suggesting that Title IX professionals forego trauma training, but that the trainings must be balanced, or, better yet, obtained from a balanced source.
WHAT IS TRAUMA?

Exposure to an event or events that creates a real or perceived threat to life, safety, or sense of well being and bodily integrity.

- May result from:
  - War
  - Natural Disasters
  - Sexual Violence
  - Relationship Violence
  - Stalking

Trauma may be acute, chronic, or complex.
## TYPES OF TRAUMA

<table>
<thead>
<tr>
<th>TYPE</th>
<th>DEFINITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Developmental</td>
<td>Early or ongoing exposure to trauma during infancy and childhood</td>
</tr>
<tr>
<td>Intergenerational</td>
<td>Psychological or emotional effects that can be experienced by people who live with trauma survivors; coping patterns can be passed from one generation to the next</td>
</tr>
<tr>
<td>Historical</td>
<td>Trauma experienced by a specific cultural group that has a history of being systematically oppressed</td>
</tr>
<tr>
<td>Secondary</td>
<td>Development of trauma-like response symptoms without witnessing or being directly involved in a traumatic event</td>
</tr>
<tr>
<td>Vicarious</td>
<td>Repeated exposure to other people’s trauma</td>
</tr>
<tr>
<td>Collective</td>
<td>Psychological reactions to a traumatic event that affect an entire society</td>
</tr>
</tbody>
</table>
HOW THE BRAIN AND BODY RESPOND TO TRAUMA

- **Amygdala**: The brain's emotional computer and alarm system
- **Hippocampus**: Brains storage for our most recent, conscious memories
- **Pre-frontal Cortex**: Where information is used to make decisions about cognitive and emotional responses
Amygdala senses a threat and sets off flight, fight, freeze, fawn response.

Hypothalamus begins responding to the crisis by sending messages and hormones.

The adrenal gland produces hormones to help the body respond to the stress.

Hormonal flood produces a biological response across the body.
HOW THE BRAIN AND BODY RESPOND TO TRAUMA (CONT.)

- Eyes: pupils dilate
- Mouth: dry mouth, decreases saliva
- Adrenal Glands: stimulates secretion of norepinephrine and epinephrine
- Brain: releases ACTH, cortisol
- Lungs: increased blood flow
- Heart: heart rate increases, increased blood flow
- Liver: releases glucose
- Bladder: inhibits urination
- Stomach: digestion slows or stops
- Skin: increased sweat production
- Hands/Extremities: shaking/trembling

IMPACT OF TRAUMA ON FUNCTIONING

- Neurological
- Emotional
- Biological
- Social
- Psychological

Trauma
HORMONAL FLOOD

- **Catecholamines (Adrenaline):** responsible for fight or flight; create mobilization but impair rational thought and decision-making

- **Opioids:** to deal with pain, create flattening affect

- **Cortisol:** affects energy availability

- **Oxytocin:** promotes good feelings to counterbalance sensation of pain

Can last 96 hours
These hormones affect the body’s ability to...

React physically

Think rationally

Consolidate or group memories

This is a neurobiological response, not a choice.
EFFECTS OF FLOODING

Hormones are released in varying amounts and may result in behavioral differences among victims:

- **Fight, Flight, Freeze, Fawn** – not a choice. Also impacted by chemical surge into prefrontal cortex, impairing ability to think rationally

- May present as confused, laughing, crying, flat, angry, irritable, or variable
Hormonal flood and dysregulation of the autonomic nervous system can cause the body to shut down

“Rape-induced paralysis”

Up to one-half of those who experience a sexual assault will also experience tonic immobility, like being awake during surgery

Know what is happening but can’t fight

This is a biological response based on survival; think of the animal world
MEMORY AND SEXUAL ASSAULT

Hippocampus is the “memory maker;” processes information into memories

Memory is formed in two steps:

1. **Encoding**: organizing sensory information coming into brain

2. **Consolidation**: grouping into memories and storing the stimulus
▪ The hormonal flood doesn’t interfere with the laying down of memory or its accuracy, but it does impair the ability of the hippocampus to **consolidate** memory.

▪ May create fragmented memories

▪ Recall can be slow and difficult
Alcohol (or other drugs) will also interfere with encoding of the context details such as time, place, and exact sequence of events.

- What is encoded will be fragmented; may result in spotty memory.
- Brain will still process sensory information, like smell.
EXPECTATIONS DURING INTERVIEW

- Expecting a Complainant to give a linear account in the days after an incident, or after having been triggered, may not be realistic.

- Memory fragmentation can be a neurobiological condition.

- Having “inconsistent” memory, pausing, and stumbling to provide an account are normal.

- Considerations for credibility assessment
  - Recognize we cannot excuse or dismiss discrepancies in testimony, but we can understand why they may exist
ADDITIONAL IMPACTS DURING THE 96 HOURS

- Physical toll on body: headaches, body ache, GI issues
- Compromised decision-making
- Emotional swings
- Self-medicating behaviors
Trauma responsive behaviors appear both during a traumatic experience and as a result of a traumatic experience.
FIGHT RESPONSE

THREAT RESPONSE

- Attack
- Assault
- Exhibit Anger

STRESS RESPONSE

- Self-preservation at all costs
- Explosive temper and outbursts
- Aggressive, angry behavior
- Controlling behaviors
- Difficulty hearing other points of view
- Demanding of others
- Dictatorial tendencies
FLIGHT RESPONSE

THREAT RESPONSE

- Attempt to flee or hide
- Pursue safety

STRESS RESPONSE

- Obsessive and/or compulsive behavior
- Feelings of panic and anxiety
- Over-worrying
- Can’t sit still; can’t relax
- Tries to micromanage situations and other people
- Always “on the go”
FREEZE RESPONSE

THREAT RESPONSE
- Can’t move
- Shut down
- Feel numb

STRESS RESPONSE
- Isolation
- Brain fog
- Disassociation
- Spacing out
- Difficulty making and acting on decisions
- Wants to hide from the world
- Achievement-phobic
- Inactive
FAWN RESPONSE

THREAT RESPONSE

▪ Try to please others
▪ Neglect own boundaries and needs

STRESS RESPONSE

▪ People-pleaser
▪ Poor boundaries
▪ Co-dependent
▪ Afraid to express true thoughts and feelings
▪ Apologizes for everything
▪ Flatters others in an exaggerated fashion
IMPACTS OF TRAUMA

1. Emotional

2. Physical

3. Behavioral

4. Worldview
VICTIM RESPONSE TO TRAUMA

May be impacted by:

- Personality
- Coping strategies
- Available support systems and resources
- General resilience
- Past history of traumatic experiences
- Cultural differences in the perception and expression of trauma
- Normalization/adaptation
IMPACT ON PARTNERS, FAMILY, AND FRIENDS

- Secondary, or indirect, victims
- Often suffer many of the same initial and long-term symptoms
- Overprotection or blame
  - Important to have informed and helpful point of contact with the institution (as permissible given privacy issues)
- High stress associated with unsupportive behaviors (e.g., emotional withdrawal, blaming)
46% of stalking victims fear not knowing what will happen next.

29% of stalking victims fear the stalking will never stop.

1 in 8 employed stalking victims lose time from work as a result of their victimization and more than half lose 5 days of work or more.

1 in 7 stalking victims move as a result of their victimization.

The prevalence of anxiety, insomnia, social dysfunction, and severe depression is much higher among stalking victims than the general population, especially if the stalking involves being followed or having one’s property destroyed.

National Stalking Resource Center, [http://victimsofcrime.org](http://victimsofcrime.org)
Trauma-Informed Intake and Interviewing

- Intake and Interview Overview
- Considerations for Conducting Interviews and Intakes
- Information Gathering Techniques
“Becoming trauma informed entails becoming more astutely aware of the ways in which people who are traumatized have their life trajectories shaped by the experience and its effects and developing policies and practices which reflect this understanding.”

INTAKE AND INTERVIEWING

- **Intake**
  - Initial contact
  - Can be any staff official
  - Receives basic info about incident
  - Makes report through appropriate channels

- **Interview**
  - Might be initial contact but more likely to occur as a follow-up, scheduled appointment
  - Trained interviewer or Investigator
  - Directly collects and gathers robust information through questioning

- Builds rapport and trust
- Establishes safety
- Offers referrals and resources
SO, WHO CONDUCTS AN INTAKE?

- First Responder
- Secondary Responder
- Initial Report Recipient
- First Investigation Meeting/Interview
- Any Initial Meeting/Interview

Intake
INTAKE MODELS/APPROACHES

- Sexual Assault Response Team (SART)
- Crisis Center
- Key person
  - Coordinator, Advocate, Administrator
- Advocacy Group
- “No Wrong Doors”
HOW DOES INTAKE DIFFER FROM ADVOCACY?

**Advocacy**
- More “partisan”
- Coordinating resources and remedies
- Longer-term
- Listening, guiding, supporting
- More legally oriented

**Intake**
- More “neutral”
- Connect with resources and remedies
- Initial contact
- Receiving information/report
- Less legally oriented
CONSIDERATIONS FOR INTAKES AND INTERVIEWS

- Environment
- Rapport and Trust
- Language
- Trauma Informed
WHAT MIGHT SHUT VICTIMS DOWN

- Unsupportive responses

  - Avoid:
    - Taking control more than needed
    - Escalating the situation
    - Defining or labeling their experience
    - Asking why questions
    - “Why did you . . . ?”
    - Verbalizing judgment in the moment
    - Telling them they must press charges or submit a formal complaint
INTERVIEW AND INFORMATION GATHERING TECHNIQUES

- Four courses dedicated to investigation, including Civil Rights Investigator Four: Advanced Interviewing Skills
  - Stage-setting
  - Notes/recording
  - Professionalism
  - Wrap-up
COMMON INTERIM & LONG-TERM REMEDIES FOR STUDENTS

- No-contact orders
- Providing a safety escort
- Adjusting course schedules, coursework, groupwork, etc.
- Residential life adjustments
- Transportation assistance
- Counseling services
- Medical services
- Academic support services, such as tutoring
- Re-take a course/withdraw from a class without penalty

- Refunds, transcript adjustments
- Incompletes and Independent Study
- Taking actions to prevent retaliation
- School-wide training and education initiatives & programming
- Referral to and facilitate connection with police and community resources
COMMON INTERIM & LONG-TERM REMEDIES FOR FACULTY & STAFF

- No-contact orders
- Providing a safety escort
- Adjusting work schedules
- Adjust supervisory/reporting arrangements
- Counseling services (EAP, etc.)
- Paid Leave
- Unpaid Leave (use caution)
- Adjusting work tasks

- Taking actions to prevent or redress retaliation
- Training and education initiatives
- Supervisor notification
- Referral to and facilitate connection with police and community resources
- Sensitivity training and educational programming
UNDERREPORTING

Remember, not everyone makes it to the intake/interview phase....

- Fear of not being believed
- Fear of being blamed
- Not defining what happened as sexual harassment
- Fear of retaliation
- Concerns about confidentiality
- Negative associations with medical, law enforcement, or legal establishments
- Cultural norms
- To whom and how to disclose
- Concerns if alcohol or drugs were used and/or if underage
- Delayed reporting
- Re-traumatization
- Nothing will come of it
- Others?
Title IX and BIT

- Overview of Individual Roles and Responsibilities
- Shared and Overlapping Reports
- Information Sharing
- Role of Title IX on the BIT
DEFINING TERMS: BEHAVIORAL INTERVENTION TEAMS

BIT

“Behavioral Intervention Teams are small groups of school officials who meet regularly to collect and review concerning information about at-risk community members and develop intervention plans to assist them”

NABITA Advisory Board, 2018
OVERLAP OF TITLE IX AND BIT: UNDERSTANDING SCOPE & EXPERTISE

Title IX Staff
- Responsible for addressing sex/gender-based discrimination
- Legal requirements to investigate reported incidents, stop the discrimination, prevent its recurrence, and remedy the effects
- Expertise in investigations, due process, interim measures, etc., but not necessarily in violence risk assessment, prevention, and intervention

BIT Members
- Responsible for responding to all reported concerning behavior
- **Receive** all reports of concern, **assess** the risk for future concern, and **deploy** intervention to mitigate the risk
- Expertise in responding holistically to student needs and are trained in identifying, assessing, and responding to indicators of problematic or violent behavior but not necessarily in investigations, hearings, and due process.
Communication between BIT and Title IX utilizes the strengths and expertise of the BIT and of Title IX practitioners, resulting in:

- Streamlined processes
- Avoiding duplication
- Removing silos

Title IX staff are responsible for conducting investigations and implementing prompt and effective responses to stop the behavior, remedy the impact, and prevent the recurrence. Increasingly involving a risk assessment component:

- Interim suspensions/emergency removals
OVERLAP OF TITLE IX AND BIT (CONT.)

- BITs are designed to assess reported behavior using an objective rubric and intervene using standardized intervention protocols
  - Reduces the vulnerability for accusations of bias
  - Processes and interventions apply to everyone (not just sex- or gender-based incidents like Title IX)
  - Reduces likelihood of over/underreacting to reported behaviors
- When the intersection of these two processes is done well, students and employees are better served and institutions are better protected
Title IX Cases

Complaints involving incidents of aggression, threats of violence, violence, harm to self, stalking, hazing, vandalism, substance abuse.

For example:

- Hallucinations that cause Complainant to believe they are being stalked
- Respondent has history of suicidal ideation
- Employee’s ex-partner repeatedly calls the workplace and makes threats to employee and coworkers

BIT Cases

Referrals with components of gender-based violence necessitating Title IX-based response.

For example:

- Multiple women report that a male student is “making them uncomfortable” and behaving strangely
- Employee notifies campus police that they recently obtained an order of protection from their estranged spouse
- Student employee has been frequently late or absent from work and has visible bruising on multiple occasions
OVERLAP OF BIT AND TITLE IX (CONT.)

Sharing Information

- Supportive Measures
  - No-Contact Orders
  - Housing assignments and restrictions
  - Classroom or classwork modifications
  - Restrictions to areas of campus/specific activities
  - Emergency Removals

- Pending Informal Resolutions
- Pending Investigations/Formal Resolutions
- Outcomes, Sanctions, and Remedies
- Pending criminal investigations
- Consider communications strategies
TITLE IX ON THE BIT

Benefits

✓ Helps break down institutional silos
✓ Specialty knowledge of interim measures & remedies – for issues even beyond Title IX
✓ Streamlines an appropriate response to Title IX issues
✓ Title IX staff may know about potential risks others aren’t aware of due to responsible employee reporting requirements

Cautions

▪ Could lead to allegations of bias
▪ Many of the reports discussed by the BIT are not relevant to Title IX
▪ Adds another person to a team with already limited space
▪ Could be a conflict of interest if the person selected to serve on the BIT wears multiple hats (e.g., Deputy Title IX Coordinator and Decision-maker)
Understanding BIT Membership

- BITs are comprised of four types of members, each of which varies in their level of communication, access to database, and attendance at meetings.

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core</td>
<td></td>
</tr>
<tr>
<td>Inner</td>
<td></td>
</tr>
<tr>
<td>Middle</td>
<td></td>
</tr>
<tr>
<td>Outer</td>
<td></td>
</tr>
</tbody>
</table>
Should a Title IX representative serve on the BIT?

- Title IX Coordinator or Deputy Coordinator, not an Investigator, should be the liaison with the BIT
- Serve as “middle circle member” of the BIT, not a core member
  - Invited when they may have insight into a case
  - Aware of who is on the agenda to be discussed
  - Has limited to no access to the entire BIT database
- Title IX Coordinator should be well-trained in BIT philosophy, procedure, and operations
- BIT members should be well-trained in scope of Title IX, ability to stop, prevent and remedy, and how to make a Title IX report
VICTIM ADVOCACY

- Victim Advocacy Tenets
- Advocate Role & Advocacy Issues
- Privacy & Confidentiality
- Victim Rights
- Campus Response Team
- Medical Exam and Evidence Collection
<table>
<thead>
<tr>
<th>Victim Advocate</th>
<th>Respondent Services</th>
<th>Process Advisor</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Provides confidential services</td>
<td>- Provides equitable services to that of advocacy</td>
<td>- Provides education related to the Title IX process</td>
</tr>
<tr>
<td>- Emotional support</td>
<td>- Emotional support</td>
<td>- Accompanies to all meetings, hearings, etc.</td>
</tr>
<tr>
<td>- Psychoeducation</td>
<td>- Connection to resources</td>
<td>- Under 2020 regulations, must provide cross examination</td>
</tr>
</tbody>
</table>
BASIC TENETS OF VICTIM ADVOCACY

Provide information about choices

- Medical:
  - Physical injury
  - STI Testing or treatment
  - Evidentiary exam

- Legal:
  - Criminal – SRO, Campus or local police (if desired by victim)
  - Civil
  - Protection From Abuse (PFA) Order

- Campus:
  - Public Safety or SRO
  - Internal disciplinary and Title IX procedures
BASIC TENETS OF VICTIM ADVOCACY (CONT.)

- Listen with respect, not judgment
- Provide options not advice
- Cooperation among response team – Protocols
COMMON ROLES OF AN ADVOCATE

▪ Support
▪ Empowerment
▪ Medical evidentiary exam accompaniment
▪ Law enforcement statement accompaniment
▪ Courtroom accompaniment
▪ Psychoeducation
▪ Campus-based resolution accompaniment
▪ Listen, listen, listen
Higher education institutions may (should) designate Victims Advocates as confidential for Title IX reporting purposes.
- All K-12 employees are mandatory reporters by law
- Aggregate data still needed

Provides and gives back a sense of control
- Provides a safe haven, making disclosure more safe
- Ensure that limits to confidentiality are known
OVERLAP WITH LAW ENFORCEMENT

- Victims may report to law enforcement and pursue criminal action
  - This is the choice of the victim
  - Advocates can provide services through this external process

- Law enforcement statement:
  - Victim’s right to an advocate
  - Victim reviews and signs official version
  - Understanding that a victim’s state of mind may change in the time following an assault
    - Details may become more or less clear and/or vary from the immediate aftermath
INSTITUTION-BASED RESPONSE TEAM

- Advocate/Advisor
- Medical/Counseling personnel
  - Student Health
  - Counseling Services – Student, Employee Assistance Program
  - School Psychologist/Social Worker
- Law Enforcement
  - Local Police
  - Public Safety/SRO
- Internal Resolution Services
  - Title IX, Student Conduct/Discipline, Human Resources
- Student Affairs/Services personnel
SANE/SAFE NURSES

- Sexual Assault Nurse Examiner (SANE)/Sexual Assault Forensic Examiner (SAFE)
- Specially trained to complete a medical-legal exam of sexual assault victims
- Improved evidence collection and more sensitive initial medical response
  - Photos
  - Observations and examination
  - DNA samples
  - Victim statement
MEDICAL-EVIDENTIARY EXAM

Medical-evidentiary exam:

- Victim cooperation with law enforcement is not required
- No out-of-pocket expense
- Privacy
- Consent required for each element of exam; can be withdrawn at any time
The sooner after an assault, the more evidence may be recovered.

To preserve evidence, it is recommended that victims refrain from:
- Eating/drinking/smoking
- Bathing/showering/brushing teeth
- Urinating/defecating/douching
- Changing clothes

No judgment or blame if a victim has already done or chooses to do any of the above.
If drug facilitation is in question, the following can be preserved as evidence:

- A potentially drug-laced drink
- Vomit
- Urine
- Blood

Emergency Department

- SANE/SAFE called if available
- Otherwise, ER physician or OB/GYN resident on call
- Delays are possible
- Lengthy process
- Chain of evidence
ELEMENTS OF A MEDICAL-EVIDENTIARY EXAM

- Medical history
- Stand over paper to collect any evidence that might fall off of a victim’s body
- Clothing collection, if possible
- External exam
- Collection of victim samples: hair, blood, urine, saliva, skin, nails, etc.
- Internal exam(s), as necessary:
  - Oral, vaginal, and/or anal
  - May include use of a colposcope, or small camera, to document internal injuries such as tears or bruising
- Treatment
Respondents are also entitled to an Advisor or support person

Should be well trained in the Recipient process

Should not be the same person as the Complainant’s support person or Advisor
WORKING WITH RESPONDENTS (CONT.)

- Reputation/perception of office by campus community
- Lack of diversity of those involved in the process
- Trauma-informed processes can create actual or perceived bias in favor of Complainants and against Respondents
  - “Believe first” mindset
- Have printed materials specific to the common questions and concerns of Respondents
- Acknowledge and plan for their need for support
  - Counseling
  - Advisors
WORKING WITH RESPONDENTS (CONT.)

▪ Emphasize the institution’s focus on the fairness of the process, not the outcome of the complaint

▪ Be exceedingly transparent about process and timelines
  ▪ Notice of allegations/investigation

▪ Interim measures must be tailored to the specific circumstances
  ▪ The era of blanket “interim suspensions” is (and should be) over

▪ Ensure that the process considers both exculpatory and inculpatory evidence
  ▪ Investigator and Decision-maker work product should reflect this consideration
ADVOCACY ISSUES

- **Compassion Fatigue**: “The profound emotional and physical erosion that takes place when helpers are unable to refuel and regenerate.” (WCASP, 2019)

- **Vicarious Trauma**: A cognitive shift in beliefs about oneself or one’s world view about issues such as safety, trust, or control. For example, hearing about a particularly horrible event might compromise one’s trust or faith in humanity. (Newell and MacNeil 2010)
Secondary Traumatic Stress: The emotional duress that results when an individual hears about the firsthand trauma experiences of another. Symptoms mimic PTSD. (WCSAP, 2019)

Burnout: Burnout can include emotional exhaustion, depersonalization or cynicism, and detachment, as well as a reduced sense of personal accomplishment. (Newell and MacNeil 2010)

Organizational Trauma: A collective experience that overwhelms the organization’s defensive and protective structures leaving the entity vulnerable and helpless. (WCSAP, 2019)
WARNING SIGNS OF COMPASSION FATIGUE AND VICTIMOUS TRAUMA

Physical
- Exhaustion, insomnia, or hypersomnia
- Headaches, frequent illness
- Somatization (stress manifested as illness) such as acne, stomach aches, digestive issues, etc.

Behavioral
- Increased use of alcohol, drugs, or other addictions
- Absenteeism or avoidance of work
- Over-committed to work, exaggerated sense of responsibility
- Anger, irritability, forgetfulness
- Difficulty in relationships

Psychological
- Feeling emotionally drained, difficulty feeling sympathy or empathy
- Distancing/isolation
- Feeling cynical, resentful, professionally helpless
- Symptoms of anxiety or depression
- Negative self-image

Adopted from Washington Coalition of Sexual Assault Programs, February 2019
STRATEGIES FOR COPING W/ COMPASSION FATIGUE & VICARIOUS TRAUMA

Building Resiliency

▪ Disrupt the routine and engage your creativity
▪ Set boundaries
  ▪ Don’t check email at home
  ▪ Take time off
  ▪ Purposefully transition to “home life”
▪ Build institutional or infrastructure
Building Resiliency

- Express emotions
  - Social support: personal and professional
  - Therapy
- Focus on hope
  - Remember the stories of the victims/survivors you helped
  - Keep a positive email folder to look at
INDIVIDUAL ACTIVITY

- Preventing Burnout: Hands-On Practice
What was it like filling out this self-assessment?

Were you surprised by your results?

Did you learn anything new about yourself?

Adapted from MindTools: Essential skills for an excellent career. Burnout Self-Test - https://www.mindtools.com/pages/article/newTCS_08.htm
GROUNDING TECHNIQUES

Using the 5-4-3-2-1 technique, you will purposefully take in the details of your surroundings using each of your senses. Strive to notice small details that your mind would usually tune out, such as distant sounds, or the texture of an ordinary object.

What are 5 things you can see? Look for small details such as a pattern on the ceiling, the way light reflects off a surface, or an object you never noticed.

What are 4 things you can feel? Notice the sensation of clothing on your body, the sun on your skin, or the feeling of the chair you are sitting in. Pick up an object and examine its weight, texture, and other physical qualities.

What are 3 things you can hear? Pay special attention to the sounds your mind has tuned out, such as a ticking clock, distant traffic, or trees blowing in the wind.

What are 2 things you can smell? Try to notice smells in the air around you, like an air freshener or freshly mowed grass. You may also look around for something that has a scent, such as a flower or an unlit candle.

What is 1 thing you can taste? Carry gum, candy, or small snacks for this step. Pop one in your mouth and focus your attention closely on the flavors.

The body awareness technique will bring you into the here-and-now by directing your focus to sensations in the body. Pay special attention to the physical sensations created by each step.

1. Take 5 long, deep breaths through your nose, and exhale through puckered lips.
2. Place both feet flat on the floor. Wiggle your toes. Curl and uncurl your toes several times. Spend a moment noticing the sensations in your feet.
3. Stomp your feet on the ground several times. Pay attention to the sensations in your feet and legs as you make contact with the ground.
4. Clench your hands into fists, then release the tension. Repeat this 10 times.
5. Press your palms together. Press them harder and hold this pose for 15 seconds. Pay attention to the feeling of tension in your hands and arms.
6. Rub your palms together briskly. Notice and sound and the feeling of warmth.
7. Reach your hands over your head like you’re trying to reach the sky. Stretch like this for 5 seconds. Bring your arms down and let them relax at your sides.
8. Take 5 more deep breaths and notice the feeling of calm in your body.

Use mental exercises to take your mind off uncomfortable thoughts and feelings. They are discreet and easy to use at nearly any time or place. Experiment to see which work best for you.

- Name all the objects you see.
- Describe the steps in performing an activity you know how to do well. For example, how to shoot a basketball, prepare your favorite meal, or tie a knot.
- Count backwards from 100 by 7.
- Pick up an object and describe it in detail. Describe its color, texture, size, weight, scent, and any other qualities you notice.
- Spell your full name, and the names of three other people, backwards.
- Name all your family members, their ages, and one of their favorite activities.
- Read something backwards, letter-by-letter. Practice for at least a few minutes.
- Think of an object and “draw” it in your mind, or in the air with your finger. Try drawing your home, a vehicle, or an animal.

REFRAMING

What works for you to reset into a more positive mindset?

- Music
- Connecting with someone else
- Physical activity
- Aromatherapy
- Laughter
- Escapism: reading, TV, movie, game
- Self-improvement
- Home improvement
