ALCOHOL, DRUGS, AND SEXUAL ASSAULTS

ALCOHOL:

1) The limit for a DUI in Ohio is .08 (if you are age 21 and over) and .02 (if you are under age 21). You CAN be charged with DUI at a lower limit though.
2) NEVER let anyone get behind the wheel when they have consumed an alcoholic beverage. If you call us your friend may be arrested but they will be alive. Call the Police Department’s Communications Center and request that an Officer respond to the scene if your friend will not listen to you.
3) One drink per hour IS NOT safe because it could still affect your reaction time when trying to perform simple tasks such as braking to prevent yourself from hitting something or someone.
4) Whether you are intoxicated or sober if you are in an unsafe situation call the Police Department’s Communications Center and request that an Officer respond to your location if on campus. If you are off campus call the Police Department in that jurisdiction.

SEXUAL ASSAULT AWARENESS:

1) GHB, Rohypnol, Ketamine, and Ecstasy are out there and they are commonly used in Drug Facilitated Sexual Assaults. They can incapacitate you or make you pass out. GHB is colorless, odorless, and has no taste.
2) DO NOT separate yourself from good friends who you trust 100%. Stay in numbers even if you go to the restrooms! Look out for each other. Placing your self in a position where you are alone can give predators the opportunity to take advantage of you.
3) People who assault others can be anyone best friends, friends, or strangers so be choosy who you trust 100%!
4) Keep your drink whether alcoholic or non alcoholic in your Direct Sight and do not accept drinks from strangers! If the drink has left your Direct Sight throw it away! Understand that if your eyes are not on your drink it can be in your hands and still get tampered with. DO NOT take drinks bought for you unless you watched the bartender make it and you had your eyes on it the whole time!
5) Report suspicious activity to Police IMMEDIATELY such as if you think you see someone putting something in another persons drink or if you think you see someone trying to take advantage of someone!
FACTS TO KNOW:

1) If convicted of marijuana possession it can cost you your license and your financial aide!
2) Things can be added to marijuana (other drugs to enhance it or get you addicted) and you will not know until it is too late! Dealers are there to make money if it kills you they will find someone else to replace you!
3) Some dealers are producing what they tell people is Ecstasy and it is not what they say it is. Some Ecstasy that is being found out there is actually Meth, PCP, half PCP half LSD, ETC. Make no mistake Ecstasy itself is dangerous enough!!
4) One bad decision to get behind the wheel of a motor vehicle after consuming alcohol could cost you your life or someone else their life!
5) Allowing people to drink at your party or residence and then allowing them to leave could have a lot of negative consequences for you! Law Suits etc.!
