

## Change the Password for "WSU-Secure" Wireless Network

If you have used the "WSU-Secure" wireless network on Wright State's campus, you must change the password for the connection so you don't get locked out of your account. Most mobile devices will prompt you automatically to enter your password, but if your particular device does not, here are instructions for both iOS and Android devices.

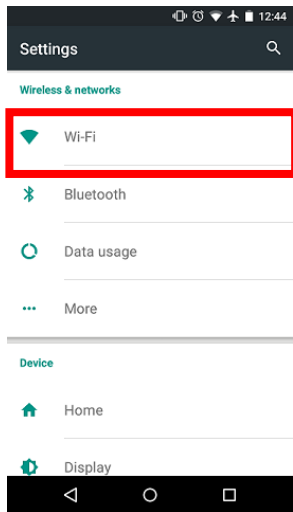

### Android Devices

*For Android devices, note that you may see different options based on the operating system version you are using.*

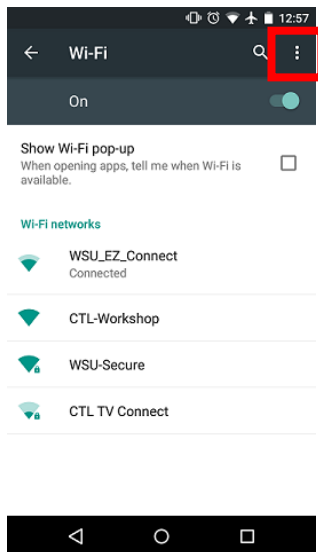

1. Go to **Settings**.

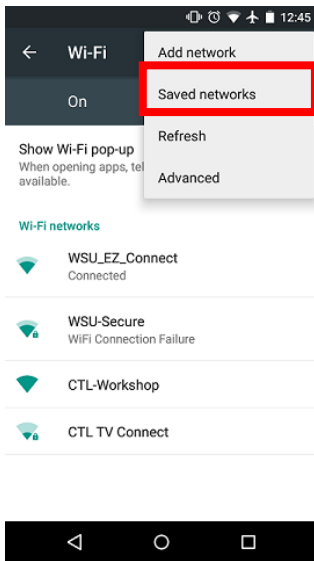

## 2. Tap Wi-Fi

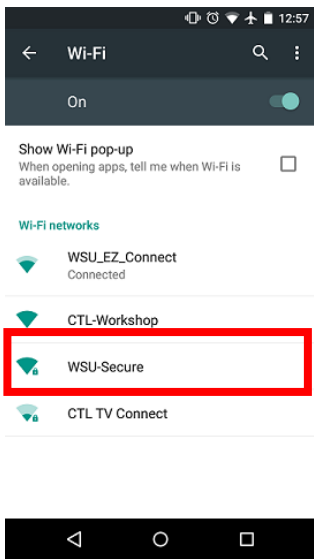

## 3. Tap the three dots indicating more settings

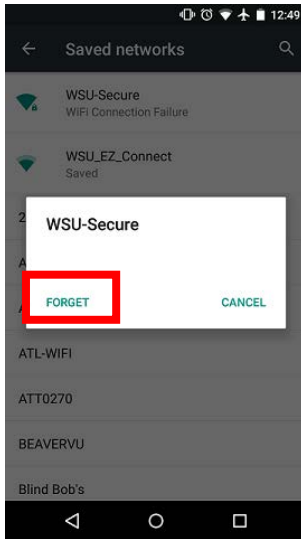

#### 4. "Saved Networks"

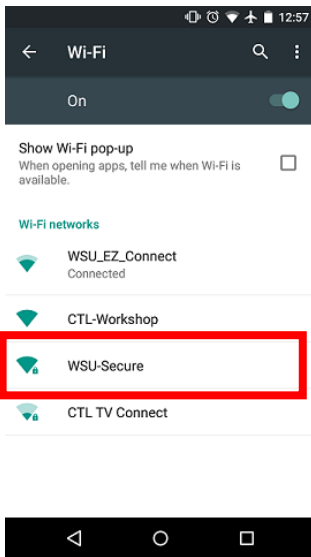

#### 5. Find and Select WSU-Secure

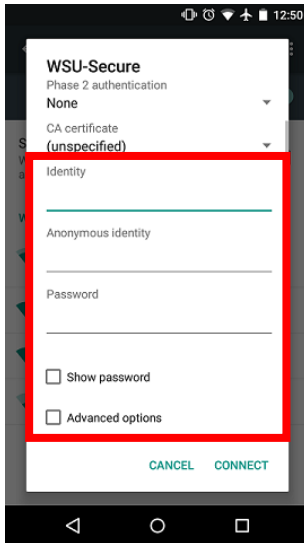

6. Tap **Forget**.

7. When you are on campus, re-select **WSU-Secure Wireless Network**.

8. Enter your username and new password.

9. Click Connect
