## Program Description

The program leading to the Master of Science degree in microbiology and immunology prepares students for careers as professional microbiologists/immunologists in industry, government, education, and research organizations, or for further professional training. Areas of specialization in the Microbiology and Immunology program include indoor allergies, basic and clinical immunology, retrovirology (retroviral variation, HIV, endogenous retroviruses), immunotoxicology, viral pathogenicity, vaccine development, immunoparasitology of ectoparasites, microbial ecology, immune modulation, algal toxins, inflammatory and immune effector cell function, cytokine signaling and apoptosis.

The M.S. degree in microbiology and immunology requires the submission and oral defense of either a research-based or literature-based thesis. Candidates are required to obtain a major advisor and an advisory committee. For the research-based thesis, the advisory committee will help formulate a study program to include a minimum of 17 semester credits of graduate work, including two seminars with an M&I prefix and 13 semester credits of research (which could include journal clubs, seminars, or special topics). For the literature-based thesis, the student, with assistance of the advisory committee, will select the additional courses required to fulfill the 30 semester credit limit. The advisory committee will also provide counseling and evaluate student progress. If a student is uncertain of a major area of concentration, the program director will serve as a temporary advisor until the student selects an area and is accepted by an advisory professor.

### Personal Statement

A personal statement summarizing the applicant's interests in the fields of Microbiology and Immunology.

### Essay

The applicant should have taken a distribution of undergraduate courses in biological sciences, chemistry, physics and mathematics that would support his or her anticipated graduate study.

### Undergraduate Background Requirements

As part of the 30 credit hours, students must complete two semesters of Biochemistry (BMB 7500 and 7520) and M&I 7260. Candidates must maintain a 3.0 cumulative average with no more than nine credit hours of C grades applicable to the degree. A maximum of 10 credits of graduate courses may be transferred from other institutions.

### Other Requirements

- Earned in the USA
- Yes (conditional admission)

## Program Website

## Program Concentration

- Option A. Research-Based Thesis Option
- Option B. Non-Research Thesis Option under the Quarter System

## Questions about Program

Dr. Barbara Hull, Director
Microbiology and Immunology M.S. Program
