Ohio University Data Protection

Todd Gardner

* OHECC - Delivered by David Belville

FOREVER OHIO

Data Protection Background

Origins of our data protection journey and where we going?

- Silos of management and solutions.   (2007 and prior)

- Breaking the silos with solution consolidation.   (2008-2015)

- Transition from physical to virtual.   (2015-2017)

- Mastering virtual server protection.   (2017-2020)

- Ransomware.   (2021)

- New challenges with containers.   (2022-2023)

FOREVER OHIO

Veeam Design

How has Veeam aided our data protection journey.

- Virtual focus with a diversity of integrations.

- Diversity of media options.

- Replication for quicker restoration.

- Bridge to the cloud.

- Ransomware protection with immutability and partner network.
