

# RESEARCH NEWS

Spring/Summer 2017 Vol. 48

## WRIGHT STATE UNIVERSITY'S EXTERNAL SUPPORT ON THE UPSWING, RESEARCH FUNDING GROWS

During the previous fiscal year (FY2016) Wright State University witnessed meaningful growth in its extramural funding profile, with a 15% increase over the previous year's total funding. Moreover, the University is currently on target to potentially surpass FY2016 funding by the end of the current fiscal year. During the first six months of FY2016, the University recorded \$47,330,300 in funding, compared to \$52,172,953 during the same time frame in FY2017, representing an increase of just over 10%.

Within its external funding profile, support for basic and applied research continues to rise. As shown in the chart, despite continued dips in overall funding from FY2013 – FY2015, research support began to bounce back in FY2014 with a 13.5% increase over FY2013, and has witnessed increasing support in subsequent years (+3.7% in FY2015 and +9.7% in FY2016).

As always, the Office of the Research and Sponsored Programs is here to offer support and assistance

to any WSU faculty or staff with locating funding opportunities and the proposal submission process. If you have an idea or project for which you need external funding, or if you were turned down for funding, stop by our office suite at 201J University Hall to discuss your ideas and learn about how our office can help you match your interests with possible funding sources, or help

you to revise and resubmit to the same or other sponsors. Please also visit our web site (<http://www.wright.edu/research/research-and-sponsored-programs>) for information about the services we offer.

# NOTES from the AVP

## Reminders: Best Practices for Security

This column presents me with a good opportunity to remind our readers of some best practices related to security.

### Operations Security (OPSEC)

Most of us practice OPSEC every day without really thinking about it. We lock our computer screens when we walk away from our offices (important to do so, even if walking away for a few minutes), we secure sensitive files and information, and we password protect our devices, among other things. OPSEC protects information and activities, unlike the physical deterrents (safes and fences) that protect facilities.

But we still do things that negate these good intentions: posting revealing personal information on social media, carrying on cell phone conversations in public places, leaving our devices unattended, using public Wi-Fi hot spots, and keeping personal information or devices in unlocked vehicles or gym lockers. Awareness is the key to OPSEC! Be aware of your surroundings at all times and practice “need to know.” If asked for information that the other party is not authorized to receive, just say no.

### Academic Solicitation

This method of solicitation applies directly to the Wright State University culture. Academic solicitation is the fastest growing method of

operation and is defined as the use of students, faculty, scientists and researchers as “collectors” improperly attempting to obtain sensitive or proprietary information. It is effective because the academic community is naturally collaborative, but this willingness to share information can have unintended consequences if not carefully managed.

A faculty member who receives an unsolicited offer from an individual seeking a position as a research scholar in his or her laboratory (at no expense to the University) should carefully consider the request before accepting. The same caution should be used when a researcher is offered an all-expense paid trip to an international conference. If it is too good to be true, it probably is, and it should be treated as a potentially suspicious contact.

### The Insider Threat

You have probably read about the notorious cases of the “insider threat”—those employees who, for whatever reasons, took government or employer secrets and risked their organization’s or national security in the course of doing so. An insider threat is defined as anyone with authorized access to the information or things an organization values most and uses that access, either wittingly or unwittingly, to inflict harm to the organization or

national security. The organization’s valuable assets may include proprietary information, trade secrets, and intellectual property.

Again, awareness is critical. If you encounter what you would consider to be unusual behavior in your work surroundings, please remember: If you SEE something, SAY something.

### Foreign Travel

Many Wright State faculty, staff and students will be traveling to foreign destinations for business and pleasure in the coming months, and it is worth taking a few precautions when doing so. If traveling to a foreign trade show or conference, know that these events are ripe for information collection. Maintain heightened awareness at foreign destinations and do not post travel plans or pictures (at least not while on travel) to social media. It is always a good idea to review travel alerts from the U.S. Department of State before departure and take advantage of the CaTS International Laptop Travel Kit.

Any questions regarding any of the topics described in this column can be directed to me in Research and Sponsored Programs. *Have a safe and secure summer!*

*Ellen*

## HELPFUL HINTS: NIH PROPOSAL WRITING RESOURCES

The NIH website is a great resource and can provide guidance when writing a research grant application. Provided below are links that will be helpful in your grant writing journey.

### How to Apply – Application Guide:

You will use the application instructions (link below) along with guidance in the funding opportunity announcement to submit your application to NIH, CDC, FDA and AHRQ. ***Please note: the funding opportunity announcement (FOA) instructions ALWAYS supersede these instructions, so be sure to read the FOA carefully.***

<https://grants.nih.gov/grants/how-to-apply-application-guide.html>

### Write Your Application:

This section will assist you in developing a strong application. The page provides tips for demonstrating to reviewers and NIH staff the high quality personnel involved in your project. The information is relevant for all research grants, but is geared toward the NIH Research Project (R01). <https://grants.nih.gov/grants/how-to-apply-application-guide/format-and-write/write-your-application.htm>

### Developing Your Budget:

As you begin to develop a budget for your research application many questions may arise. Your best resources for answering these questions are to contact your Research and Sponsored Programs Pre Award Administrator, your department administrative officials, and your peers.

The following link includes tips

and reminders for preparing a budget. This section will provide guidance on budget categories, and will help determine what budget information is required in a modular versus detailed budget. <https://grants.nih.gov/grants/how-to-apply-application-guide/format-and-write/develop-your-budget.htm>

### Format Attachments:

You will find several kinds of fields in the application forms – check boxes, dates, data entry fields, and attachments. Attachments are documents you prepare outside the application forms using whatever editing software you prefer (e.g., Microsoft Word) converted to PDF format and then uploaded to the application.

Sponsors have very specific attachment formatting requirements. Failure to follow these requirements may lead to application errors upon submission or withdrawal of the application from the review process. <https://grants.nih.gov/grants/how-to-apply-application-guide/format-and-write/format-attachments.htm>

### Page Limits:

Follow the attachment page limits specified in the link below for your research application, unless otherwise specified in the FOA. The page limits for most forms sections are listed in the following link, organized by activity code. ***Please note: the funding opportunity announcement (FOA) instructions ALWAYS supersede these page limits, so be sure to check the FOA for any exceptions.*** <https://grants.nih.gov/grants/forms/biosketch.htm>

[grants.nih.gov/grants/how-to-apply-application-guide/format-and-write/page-limits.htm](https://grants.nih.gov/grants/how-to-apply-application-guide/format-and-write/page-limits.htm)

### Data Tables:

Use these data tables with Institutional Research Training grant applications. Select the appropriate blank data tables and instructions. <https://grants.nih.gov/grants/forms/data-tables.htm>

### Reference Letters:

Some types of programs, such as fellowships and some career development awards, require the submission of reference letters by the referee. Referees must submit these letters by the application deadline in order to be considered part of the application. Applications that have fewer than the required number of reference letters will not be reviewed. <https://grants.nih.gov/grants/how-to-apply-application-guide/submission-process/reference-letters.htm>

### Biosketches:

Biosketches are required in both competing grant applications and progress reports. Blank format pages, instructions, and sample biosketches can be found at the link below. You can also try SciENcv, a tool supporting multiple research agencies, to help develop your biosketch and automatically format it to NIH requirements. <https://grants.nih.gov/grants/forms/biosketch.htm>

### AN INCREASE OF THE NIH SALARY CAP

Effective January 8, 2017, the NIH salary cap changed from \$185,100 to \$187,000. See NOT-OD-17-049 for further details. <https://grants.nih.gov/grants/guide/notice-files/NOT-OD-17-049.html>

### NATIONAL SCIENCE FOUNDATION: A CHANGE TO THE COLLABORATORS AND OTHER AFFILIATIONS SECTION, AND A REQUEST FOR FEEDBACK

(Adapted from a communication from NSF)

On April 24, 2017, the National Science Foundation (NSF) began a new pilot requiring the use of a template for identifying Collaborators and Other Affiliations (COA) information for Principal Investigators (PIs), co-PIs, and other senior project personnel identified on proposals submitted in FastLane. The 17-1 version of the NSF Proposal and Award Policies & Procedures Guide (PAPPG) requires individually uploaded COA information as a Single Copy Document. The NSF uses this information during the merit review process to help manage reviewer selection. To expedite identification of potential reviewers, having a standard, searchable format for this information is essential. The new pilot will standardize COA information across the Foundation and will ensure that the information is submitted in a searchable format. In addition to the merit review process benefits, the COA template will reduce administrative burden and improve efficiencies by providing submitters with a compliant and reusable format to maintain this information for use in subsequent proposal submissions to NSF.

Pilot results will be assessed and will determine how to proceed with this section of the proposal in the future. Please note that the template:

- ♦ **Has been developed to be fillable. However, the content and format requirements must not be altered by submitters.**
- ♦ **Must be saved in .xlsx or .xls formats and directly uploaded into FastLane as a Collaborators and Other Affiliations Single Copy Document.**
- ♦ **Will be converted by FastLane from an .xlsx or .xls file to a PDF file.**
- ♦ **Has been tested in Microsoft Excel, Google Sheets, and LibreOffice.**

- ♦ **Will enable preservation of searchable text that otherwise would be lost. Must be uploaded in .xlsx or .xls formats only. Uploading a COA Single Copy Document in any other format may delay the timely processing and review of proposals.**
- ♦ **Will be directly linked in FastLane. The template and associated instructions may also be accessed directly at: <https://www.nsf.gov/bfa/dias/policy/coa.jsp>.**

The new spreadsheet template is part of a pilot activity, and NSF wants your feedback on the use of the template to submit COA information in FastLane. NSF will be collecting your template feedback via Research.gov until **COB July 14, 2017**. This timeline will allow NSF to incorporate any changes to the Collaborators and Other Affiliations information requirement into the next PAPPG, which is scheduled to go into effect in January 2018. To submit COA template feedback:

1. Go to: [https://www.research.gov/research-portal/appmanager/base/desktop?nfpb=true&\\_pageLabel=research\\_home\\_page&eventName=research\\_feedback\\_event](https://www.research.gov/research-portal/appmanager/base/desktop?nfpb=true&_pageLabel=research_home_page&eventName=research_feedback_event)
2. Choose “Collaborators & Other Affiliations (COA)” under the Site Area dropdown menu;
3. Include your feedback in the Comments or Suggestions field; and
4. Click Submit when you are ready to send your feedback to NSF.

For system-related questions, please contact FastLane User Support at 1-800-673-6188 or [fastlane@nsf.gov](mailto:fastlane@nsf.gov). Policy-related questions regarding the content of the COA template, should be directed to [policy@nsf.gov](mailto:policy@nsf.gov).

### WHAT'S ALL THE FUSS ABOUT PUSHING THE SUBMIT BUTTON? A REMINDER

Electronic submission of grant proposals is the norm today and, as such, Pre Award Administrators frequently hear the phrase, "I'll have it to you by 4:00 p.m." on deadline day. This scenario results in many proposals being submitted to the sponsor at 4:55 p.m. or later on the day the proposal is due. Once a proposal is received in RSP, the Pre Award Administrator must submit the proposal through an electronic portal that is often overburdened on deadline days, and the late-day transmission to RSP does not allow time to complete a thorough review of the proposal for compliance with sponsor guidelines prior to submission. By waiting until 4 p.m. or later to forward the complete proposal to RSP, a researcher runs the risk of not having time to make any changes found necessary after late-day submission of the proposal to the sponsor.

While it may seem, in the age of electronic submission via Grants.gov, eRA Commons, and Fastlane, that the guesswork of on-time submission is removed, a variety of pitfalls emerge the closer one is to the stated deadline. This rush of submissions can create a potential sponsor backlog in processing, and checking for errors can take up to four hours. If the submission is found to have errors, and those errors cannot be corrected before the stated deadline, the application cannot be sent on for review.

In addition to these last-minute scenarios, inclement weather can also impede a proposal submission, and in many cases, the sponsor is unmoved by this difficulty; proposals are still due on the deadline day despite the potential for University closure. For these and many

**Five (5) business days prior to submission deadline RSP must receive:**

- ⇒ **Final budget (request and cost share)**
- ⇒ **Budget justification**
- ⇒ **Abstract**

**Two (2) business days prior to submission deadline RSP must receive:**

- ⇒ **Complete proposal ready for submission**

other reasons, RSP established a 5-day/2-day proposal review and submission timeline.

Scenarios like this can be avoided by submitting several hours and days in advance of the deadline. Research and Sponsored Programs strongly encourages you to contact them when you first make the decision to submit an application for funding (see below). We can provide the assistance you need for a successful submission, especially if we are aware of your proposal needs!

## Pre Award News, cont'd

### PROPOSAL BUDGET DEVELOPMENT: UPDATED RATES FOR FACILITIES AND ADMINISTRATIVE COSTS (F&A), FRINGE BENEFITS

#### Facilities and Administrative Costs

Wright State University just concluded negotiations with its cognizant federal agency, the US Department of Health and Human Services, which established updated rates for both facilities and administrative costs (F&A) and fringe benefits. The following F&A rates will be effective for the timeframe of July 1, 2017 to June 30, 2020:

|                                  |            |
|----------------------------------|------------|
| <b>On-Campus Research</b>        | <b>50%</b> |
| <b>On-Campus Instruction</b>     | <b>50%</b> |
| <b>On-Campus Other Activity</b>  | <b>37%</b> |
| <b>Off-Campus All Activities</b> | <b>26%</b> |

While the rate for off-campus activities remained unchanged, on-campus activities increased by two percentage points from the previous rate agreement. As a reminder, the University's rates apply to a project's modified total direct costs, consisting of all salaries and wages, fringe benefits, materials, supplies, services, travel, and subgrants/subcontracts up to the first \$25,000 of each subgrant/subcontract (regardless of the project period). Application of the appropriate F&A rates to proposals for extramural funding shall comply with University Policy No. 6340, which can

be found at the following link: <https://policy.wright.edu/policy/6340-facilities-and-administrative-indirect-costs-sponsored-programs>.

#### Fringe Benefits Rates for FY2018

As you develop a proposal budget, keep in mind that salary and fringe benefits rates may change over time, perhaps even annually. Such is the case with the University's fringe benefits for FY2018. Effective July 1, 2017 to June 30, 2018, fringe benefit rates for faculty, staff, and students will change to the following: full-time faculty (51% FTE or more), 26.4%; faculty – part-time, overload, summer, retirees, 12.7%; full-time unclassified (including hourly), 34.8%; part-time un/classified staff, 15.0%; full-time classified staff, 54.90%; and OPERS-covered students, 16.2%. A proposal budget should reflect current rates, and when developing a multi-year budget, the fringe benefit rate should be increased by 1.5% over the previous years to cover potential/projected inflation. For help with budget development, communicate with your Pre Award Administrator. For additional budget guidance, please visit the RSP website: <https://www.wright.edu/research/research-and-sponsored-programs/pre-award/budget-development>.

### SAVE THE DATE FOR SPIN TRAINING!

This interactive training session on the SPIN funding database walks attendees through the process of utilizing the electronic search engine-style database to identify potential funding sources to support research and other sponsored programs. The 45-60 minute workshop will be held in LX016 and offered on **Wednesday, June 28 at 11:00 a.m. and Wednesday, August 23 at 10 a.m.** To attend either session, please RSVP at your earliest convenience to [deborah.lundin@wright.edu](mailto:deborah.lundin@wright.edu) or call extension 2423.

**\*\*NOTE: Preregistration is strongly encouraged to ensure your access to the database (you must be entered in the InfoEd GENIUS database prior to attending - RSP can accomplish this entry for you when you reserve your space at the workshop).**

### HOW TO AVOID JOURNAL-VOUCHER REJECTION

You've submitted the perfect journal voucher (JV) to transfer expenses from your unrestricted fund to a grant. It speeds its way through the approval process...until it gets to RSP Post Award. You receive an email from your grants accountant, requesting more information for the JV. What? You say you completed this JV the same way you always do JVs? That is most certainly true, but JVs affecting 6xxxxx funds require more detailed information.

All JVs should include detailed information regarding the expense that is being transferred:

- Transaction date of the original expense
- Banner document code of the original expense (for example, invoice number or Travel Authorization number)
- Vendor or supplier name for the original expense
- Description of the expense
- Dollar amount of the expense, if there is more than one expense being transferred on the same JV
- Reason for the expense transfer

Providing this information will generally allow anyone viewing the JV to locate the source of the expense being transferred in Wings Express Finance (WEF). If you've ever had to research a transferred expense, you know that the more information, the better!

For JVs affecting 6xxxxx funds:

- An explanation of how the expense benefits the grant/fund should be included
- For procard expense transfers, attach a copy of the procard statement and the backup documentation to the JV

Non-procard expense documents can generally be located within WEF. However, procard expense documents are not available directly through WEF.

Why is this additional information required?

- Post Award is able to review the expense and verify its allowability and applicability to the grant/fund
- If there is an internal or external audit, the source documents can be readily accessed

The University community as a whole is working towards a higher level of efficiency. JVs that include the proper documentation save time for all involved. In FY2015, 4,300 J16 (expense transfers) JVs were generated. On average, 18%, or 774 JVs, were disapproved for various reasons. That is a lot of wasted effort!

Your grants accountant (<https://www.wright.edu/research/research-and-sponsored-programs/post-award/post-award-services>) can usually correct an incorrect JV or add document text to clarify the expense as needed. This is still somewhat time consuming, but generally more efficient than disapproving and re-initiating the JV.

For additional information, please contact the Post Award department, and visit the link: <https://www.wright.edu/research/research-and-sponsored-programs/post-award/grant-expenditures>.

*We're always here to help!*

## IRB GOES ELECTRONIC IN THE RSP GATEWAY, UPDATES

The Human Subjects module in the RSP Gateway is now operational. And, effective June 1, 2017, all IRB submissions for Human Subjects ***must be submitted*** through the RSP Gateway. Training sessions for the Human Subjects module will occur once a month. The dates and times for training scheduled through August 2017 are listed below. Please contact Robyn

Wilks (ext. 4462) or Jodi Blacklidge (ext. 3974) if you would like to attend a session.

Additionally, the IRB deadline dates are changing. Please see the information below for the revised IRB deadline dates. The revised dates are effective as of July 1, 2017.

| RSP GATEWAY<br>HUMAN SUBJECTS MODULE<br>TRAINING SCHEDULE<br>SUMMER/FALL 2017 |                                    |

## IACUC TO GO ELECTRONIC IN THE RSP GATEWAY IN JULY

The Institutional Animal Care and Use Committee (IACUC) module in the RSP Gateway is almost ready. Research and Sponsored Programs (RSP) staff are putting the final touches on the eForms and trials are currently underway with the committee to ensure that all processes are in working order. What does this mean for you? In the coming months we will be transitioning to the new, electronic protocol submission process. Your current protocols will still be in

place and usable. For new submissions, you will be required to use the RSP Gateway. RSP staff will schedule training sessions to educate investigators and interested staff on accessing and using the newly released module. The anticipated launch date is July 1, 2017. Questions? Contact Laboratory Animal Resources (LAR) at ext. 2792, or Mandy Karper, Compliance Coordinator in Research and Sponsored Programs, at ext. 3332.

# Research Compliance News, cont'd

## EXPORT COMPLIANCE: POLICY AND RESOURCES FORTHCOMING

The Office of Research Compliance is enhancing and expanding Wright State's export compliance (EC) program, which encompasses all of the federal rules and regulations governing export controls and trade sanctions. The primary sources of these laws are the Department of Commerce's Export Administration Regulations (EAR), the Department of State's International Traffic in Arms Regulations (ITAR), and the Department of Treasury's Office of Foreign Asset Control (OFAC). Other federal agencies may have their own rules, potentially resulting in additional restrictions.

Much of the focus of the EAR and ITAR is on identifying and classifying

sensitive technology, and protecting it from "foreign persons," including everything from equipment shipments overseas to viewing drawings or diagrams in one's office. We are working with colleges, departments, and other offices – HR, Purchasing, UCIE, CaTS, Shipping/Receiving, to name a few – to implement the steps necessary to protect the university and its personnel. Risks of noncompliance include fines in the hundreds of thousands of dollars as well as potential jail time.

There is a natural tension with export compliance and a university. One seeks to limit who has access to sensitive technology and information in an environment that is driven by presen-

tation and publications. Our EC program is focused on assisting faculty, staff, and students with taking the appropriate steps to comply with the many rules while also balancing the desire to make public the great research being performed here.

In the coming months, new information will be posted to the export controls website (<http://www.wright.edu/research/compliance/export-control>), have more opportunities for learning about EC, and a new university policy will be released.

We look forward to partnering with you to enhance all our research compliance efforts. Questions? Please call the Office of Research Compliance at 775-3853.
