

Winners Announced for Annual Research Initiation and Professional Development Grants

The Wright State University Research Council recently convened to review submissions to its 2012 competition for the Research Initiation and Professional Development Grant Program. The Council received 33 quality proposals for funds to support new lines of research, as well as diverse scholarly activities and professional renewal. The Research Council would like to extend its congratulations to the 13 new awardees:

Research Initiation

Bae, Ha-Rok	CECS	<i>Knowledge Extraction Using Engineering Data Analysis</i>	\$10,000
Brewer, Tracy	CoNH	<i>Interdisciplinary Faculty Beliefs and Organizational Readiness for Curricular Integration of Evidence-Based Practices</i>	\$9,320
Ganapathy, Subashini	CECS	<i>Cognitive Framework for Minimally Invasive Surgical Procedures</i>	\$10,000
Hance, Dennis	LAKE	<i>Autonomous and Remote Control Aircraft and Watercraft Research Platforms for Air and Water Sampling of the Grand Lake St. Mary's Area</i>	\$3,000
Lyons, Brian	RSCoB	<i>Investigating Individual Difference Antecedents and Outcomes of Why (or Why Not) Employees Report Counterproductive Work Behaviors</i>	\$3,509
Peters, Jeffrey	CoSM	<i>Disentangling the Effects of Drift and Selection on Genetic Diversity in Anas Ducks</i>	\$10,000
Roberts, Rory	CECS	<i>Advanced UAV Propulsion System with SOFC Based Combustor</i>	\$10,000
Yang, Zifeng	CECS	<i>Characterization and Restriction of Turbulence and Noise in the Wake of Wind Turbines</i>	\$9,343

Professional Development

Hartzler, Lynn	CoSM	<i>Identification of Chemosensitive Regions of Poikilotherms with Variable pH Regulating Strategies</i>	\$3,000
Hennessy, Michael	CoSM	<i>Collaborations on Behavior Development</i>	\$2,040
Mejia-LaPerle, Carol	CoLA	<i>John Ogilby's Atlas Chinensis and Seventh Century English Translation of Global Encounters</i>	\$2,958
Rante, Danielle	CoLA	<i>Iceland Research: Markers of Time</i>	\$3,000
Snipe, Tracy	CoLA	<i>Unsung Heroines, Untold Stories of the SSBC Bombing</i>	\$3,000

Notes from the AVP:

Redefining Federal Government Efficiency?

The Federal government is soliciting comments on their ideas for increasing “efficiency and effectiveness of grant programs by eliminating unnecessary and duplicative requirements” (Federal Register, Vol. 77, pg. 11778 <https://federalregister.gov/a/2012-4521>). In the referenced issue of the Federal Register, the Office of Management and Budget has published an “Advance Notice of Proposed Guidance” for the “Reform of Federal Policies Relating to Grants and Cooperative Agreements; Cost Principles and Administrative Requirements (Including Single Audit Act).” For those of us on campuses who administer research and for those who actually do the research, the idea of reform in this area sounds very appealing. But just what is the government proposing?

I guess the best news is that there is some commitment on the part of the government to reform requirements that are seen by them as “overly burdensome.” The major areas of reform identified at the top level are “Reforms to Audit Requirements” and “Reforms to Cost Principles.” These both appear to be excellent starting points! It makes sense to concentrate resources on entities that are higher-dollar and higher-risk and reduce the burden for lower risk areas. This probably would not have an impact on WSU, but very small entities might be saved some of the heartache. And we may all benefit from the proposed idea of “Streamlining the universal compliance

requirements in the Circular A-133 Compliance Supplement.” WSU falls under the requirements for A-133.

There are a lot of very appealing words in the Federal Register announcement: coordination, consolidation, providing alternatives, reducing negotiation costs, etc. Our researchers might particularly appreciate the idea of “charging directly allocable administrative support as a direct cost” or “exploring alternatives to time-and-effort reporting requirements for salaries and wages.” And I am sure that this idea would be a big hit: “For indirect (‘facilities and administrative’) costs, using flat rates instead of negotiated rates” or the option of establishing a mandatory flat rate that is discounted.

For researchers searching for funding opportunities, the Federal government is proposing to create a standard format for funding opportunity announcements and would require Federal agencies to provide a 90-day notice of those opportunities. If only they could require that a proposal is submitted 24 hours in advance of a deadline. That would be a reform we could really support!

It will be interesting to watch how this all plays out. The deadline for comments was April 30, 2012, and we are relying on our colleagues at the Council on Governmental Relations (COGR) to officially respond on behalf of its membership. We will keep you posted (especially if that discounted indirect cost rate comes to pass).

RSP Welcomes Dr. Robert E. W. Fyffe, New Vice President for Research and Graduate Studies

Robert E. W. Fyffe, Ph.D., professor of neuroscience, cell biology, and physiology, was named Vice President for Research and Graduate Studies effective in February 2012. He replaced Dr. Jack Bantle, who retired in January 2012. A member of Wright State's faculty since 1992, in his most recent appointment as Associate Dean for Research Affairs at the Boonshoft School of Medicine (which began in April 2001), Dr. Fyffe was responsible for overseeing programs that supported the medical school's research activities in the basic and clinical sciences.

From 2000 to 2006, Dr. Fyffe also served as director of Wright State's Center for Brain Research. In 2007, the Boonshoft School of Medicine significantly expanded the scope and mission of the Center for Brain Research by establishing the Comprehensive Neuroscience Center (CNC) for improving research of neurological, developmental, cognitive, psychiatric, and trauma-induced nervous system disorders.

A native of Alexandria, Scotland, Dr. Fyffe received a B.Sc. degree with honors in biochemistry from the University of Glasgow. He holds M.Sc.

and Ph.D. degrees in neurophysiology from the University of Edinburgh.

Before joining Wright State's faculty, he was a research fellow at the Australian National University and a faculty member at the University of North Carolina at Chapel Hill. Dr. Fyffe's research on the anatomy and physiology of nerve cells is funded by the National Institutes of Health (NIH).

In 2008, Dr. Fyffe received the distinction of being named a University Professor. The title is a special rank awarded by the Wright State University Board of Trustees. It is reserved for full professors who have made outstanding contributions beyond the confines of their own discipline.

Dr. Fyffe brings with him a proven record of administering programs that support research activities and will provide the leadership necessary to maintain Wright State University's excellence in research, scholarship, and graduate programs. He will also be a strong advocate for the diverse constituencies involved in the university's research enterprise.

RSP staff look forward to working with Dr. Fyffe in assisting Wright State faculty to be successful in their research endeavors.

RSP Orientation Seminar

Are you new to Wright State University or new to the world of extramural funding? Are you a veteran Wright State faculty or staff member re-entering the world of extramural funding?

On Tuesday, October 16, the Office of Research and Sponsored Programs will conduct an orientation seminar for ALL interested faculty. We will cover such topics as *guidance on locating funding for research, information regarding internal funding programs, instructions on the WSU proposal submission process, and advice on compliance issues*. The Research and Sponsored Programs Orientation seminar will be in E156B/C Student Union (Endeavor Room). Please mark your calendar and look for details in our fall issue of Research News.

DON'T FORGET! SAVE THE DATE!

NSF'S REVISED COST SHARING POLICY: A REMINDER

In effect since January 2011, the National Science Foundation continues to enforce its Revised Cost Sharing Policy, which includes two significant changes:

- 1) except when required in an NSF solicitation, inclusion of voluntary committed cost sharing is prohibited, and
- 2) NSF-required mandatory cost sharing will only be required when explicitly authorized by the NSF Director.

What does this mean for your proposal?

When you are completing a proposal for the National Science Foundation, either as the lead applicant or a subaward to another entity, you are not allowed to include any information regarding voluntary committed cost share either in the budget or budget justification. Instead, according to the NSF Revised Cost Sharing Policy Frequently Asked Questions (FAQ), "in order to assess the scope of the project, all organizational resources necessary for the project (both physical and personnel) must be described in the Facilities, Equipment and Other Resources section of the proposal (see NSF

Grant Proposal Guide (GPG) Chapter II.C.2.i for more information). The description should be narrative in nature and must not include any quantifiable financial information.... Narrative descriptions of the resources available (both physical and personnel) should be included in the Facilities section and not in other areas of the proposal."

What happens if you submit a proposal to NSF that does not comply with the NSF Revised Cost Sharing Policy?

According to the Policy FAQs, "while references to voluntary committed cost sharing may not always be identified during initial administrative screening of proposals, should violations of the policy be found during merit review or budget negotiation, the proposer does run the risk of the proposal being returned without review or declined."

If you are unsure about how this policy may affect your future proposals, visit and review the Policy FAQs (http://www.nsf.gov/publications/pub_summ.jsp?ods_key=costsharefaqs). If you continue to have questions, please contact the RSP PreAward Administrator for your department at ext. 2425 for further information and guidance.

SALARY CAP LOWERED ON NIH AWARDS

On December 23, 2011, the Consolidation Appropriations Act, 2012 (Public Law 112-74) was signed into law, restricting the amount of direct salary to Executive Level II of the Federal Executive Pay scale,

which is \$179,700. Given the timing of the passage of the Act in the midst of Federal Fiscal Year 2012, NIH has provided the following guidance for applying the cap:

- For competing and non-competing grants with a FY12 initial issue date of 10/01/2012 to 12/22/2011, the previous salary cap of \$199,700 applies initially. In future years, the new cap will apply; competing grants will have their budgets adjusted downward with no option to rebudget the excess funds, and non-competing grant budgets will be allowed to rebudget their excess funds.
- For competing and non-competing grants with an FY12 initial issue date of 12/23/2011 or later, the new cap of \$179,700 will apply. For competing grants, the award for current and future years will be adjusted downward; for non-competing grants, awards will not be adjusted downward and, unless otherwise restricted, grantees may rebudget excess funds.

If you are interested in reading the originally issued NIH notice regarding the new salary cap, see: <http://grants.nih.gov/grants/guide/notice-files/NOT-OD-12-035.html>. If you want to learn more about how the new salary cap affects your current project, or want additional information on how this policy may affect future applications, contact the RSP PreAward Administrator for your area at ext.2425.

(Continued)

INFLATION CAPPED ON NIH AWARDS

With the passage of the Consolidation Appropriations Act, 2012 (Public Law 112-74) on December 23, 2011, the NIH received \$30.7 billion for its Federal Fiscal Year 2012 budget, which reflects an increase of less than one per cent over FY2011.

In an attempt to effectively manage its portfolio of research investments, NIH drafted a Fiscal Operations Policy for FY2012, which includes the following policy items:

- *Non-competing awards will be issued without inflationary adjustments in FY2012, though adjustments for special needs (equipment and added personnel) will still be considered.*
- *The NIH will make an effort to keep the average size of award constant at FY2011 levels or lower.*
- *Inflationary increases for future years beyond FY2012 will be discontinued for competing/non-competing awards issued in FY2012, though adjustments for special needs (equipment and added personnel) will still be considered.*
- *FY2012 awards already issued will be revised to adjust the award level and*

future commitments to reflect the new policy.

- *NIH will institute a 2% inflationary increase at all stipend levels for the Ruth L. Kirschstein National Research Service Awards.*

As described in the earlier article regarding the salary cap, the new NIH salary cap is \$179,700

applied accordingly to competing and non-competing awards.

If you want to learn more about how the NIH Fiscal Operations Policy for 2012 affects your current project, or want additional information on how it may affect future applications, call ext. 2425 for the RSP PreAward Administrator for your area.

EHS NEWS

Points of Contact at Environmental Health & Safety

The Department of Environmental Health and Safety serves to ensure a safe and healthy environment for all students, employees, and visitors to Wright State University in support of the university's overall mission. Our mission integrates into the needs of researchers through the required protocol approval processes to ensure safe laboratory practices. Please contact our office for assistance.

***Marjorie Markopoulos,
Biological and Chemical
Safety Officer***

Marjorie oversees chemical hygiene, biological safety, bloodborne pathogen, respiratory protection, and the departmental hazardous material response programs. She also serves on the Institutional Biosafety and Animal Care and Use Committees.

If your research involves the use of chemical or biological material you can contact Marjorie at ext. 2797 or at marjorie.markopoulos@wright.edu

***Kimberly Morris,
Radiation Safety Officer***

Kimberly manages and maintains responsibility for the safe use and control of radioactive materials, radiation-generating equipment, lasers, radon, and non-ionizing radiation sources at the university. In this capacity, she serves on and coordinates the business of the Radiation Safety Committee. For all radiation and laser issues, contact Kimberly Morris at ext. 2169 or kimberly.morris@wright.edu. For more information on any of our safety related programs please visit our website at <http://www.wright.edu/administration/ehs/>.

ADVICE FROM THE NIH (AND RSP): SUBMIT EARLY!

“As the electronic submission process has improved, so have the potential dangers when submitting an application near the deadline.”
(from a December 2011 NIH Article, The Dangers of Delay)

One of the most critical pieces of advice funding agencies give out (repeatedly) is “submit your proposal early.” While it may seem, in the age of electronic submission via Grants.gov, eRA Commons, and Fastlane, that the guesswork of on-time submission is removed, additional pitfalls emerge the closer one is to the stated deadline. In one recent December deadline for NIH, the agency noted that more than 1,000 applications were submitted in the final hour. They offered the following scenario as an example of what could happen in that final hour:

- The application is due at 5 p.m.
- The proposal is submitted at 4 p.m. on the due date.
- Processing takes an hour and 45 minutes.
- Two errors were identified.

This rush of submissions can create a potential back-log in processing; checking for errors can take up to 4 hours (remember: a submission must be error free before it can be sent on for review). With the discovery of the two errors, a proposal submission for correction is *now 45 minutes beyond the stated deadline and*

NIH policy will not allow for the consideration of the application.

Scenarios like this can be avoided by submitting several hours and/or days in advance of the deadline. Research and Sponsored Programs strongly encourages you to contact them when you first make the decision to submit an application for funding (see diagram below). We can provide the assistance you need for a successful submission, especially if we are aware of your proposal needs!

Identify Funding Opportunity

Notify RSP PreAward Administrator of upcoming submission.

Prepare Proposal

Work with project personnel, collaborators, and RSP to complete narrative, budget and grant forms.

Final Proposal to RSP

The final form proposal should be submitted to RSP at least 5 business days prior to deadline. If the proposal is received in less than five days, RSP cannot guarantee on-time submission.

Submission of Proposal

Proposal submission, especially electronic formats, should be completed at least 24 hours in advance of the deadline.

SPIN FUNDING DATABASE AVAILABLE!

The Office of Research and Sponsored Programs (RSP) has now transitioned away from its previous subscription to the Community of Science (COS) funding database and adopted the new Sponsored Programs Information Network (SPIN) database. SPIN will provide a quality, Google-style search experience built upon numerous user-identified parameters.

While InfoEd Global, the creators of SPIN, continues to update the database's capabilities, Wright State University has been provided access to it for active use by all faculty, staff, and students. It can be reached by visiting the

following link located at the RSP funding opportunities web page: <http://www.wright.edu/rsp/resources.html>. Please note the following current, mid-term limitations:

- *Wright State University faculty, staff, and students can access SPIN while on campus (within the WSU data network) or off campus using Virtual Private Networks (VPN) procedures.*
- *Users can actively search SPIN and download opportunities to MS Word or Excel.*

In the coming months, SPIN will allow users to save funding searches and utilize an email notification system.

Throughout the summer months and into the new semester, RSP will provide ongoing training on SPIN and other InfoEd modules as they become available. Training sessions will be advertised on the faculty/staff listservs. To attend one of the scheduled sessions, please RSVP at your earliest convenience to Jan Power (rsp@wright.edu or ext. 2425). If you are unable to attend the scheduled trainings, would prefer individualized guidance on navigating the new system, or simply have some questions/concerns, please contact Katie Feldhues at rsp@wright.edu or ext. 2425, or Deborah Lundin at deborah.lundin@wright.edu or ext. 2423.

PreAward *NEWS*

Update on InfoEd Progress

The PreAward staff in Research and Sponsored Programs is working diligently on the implementation of the InfoEd module for proposal development (PD). The PD module will be used to prepare

proposals for the system-to-system transmission of Grants.gov proposals and the internal routing of all proposals. We have been preparing processes and test cases to ensure that when we go live with the departments

selected for a pilot program, it will be a smooth transition. We will keep you updated on our progress and keep you alerted to any training that will be made available for the new procedures.
