If you’re trying to quit smoking, Why go it alone?

Now you’ve got more support than ever — and it comes at no extra cost!

Under health care reform, you can get certain FDA-approved prescription drugs and many over-the-counter (OTC) products to help you quit smoking and it won’t cost you anything extra!

It’s all part of the preventive care benefit that comes with health care reform. Here’s how it works: To get certain prescriptions and nicotine replacement products covered in full (no cost to you), here’s all you have to do:

1. **Ask your doctor** if one or more of the covered prescription drugs and/or OTC products (listed on the next page) would be good for you. If so, you’ll need to get a prescription for each one. (Yes, even certain OTC products to help you quit smoking will need a prescription in order to be covered at no cost to you.)

2. **Go to a pharmacy** that’s in your health plan’s network to fill your prescription. You can check anthem.com to find a network pharmacy.

3. **Show the pharmacist proof that you’re at least 18** years of age. If you’re under 18, you may need to speak with your doctor or other health care professional to get your OTC product, because by law, they can only be sold to people who are over 18.

Once you quit, better health begins — in minutes!

You’ll literally get healthier 20 minutes after you quit smoking because your heart rate and blood pressure will go down. In the months to follow, your circulation will improve and your chances of getting heart disease, stroke and cancer will drop significantly, too.¹

Ready to call it quits?

See the next page for a list of FDA-approved prescription drugs and OTC products that you can get at no cost. If you have any questions, call the phone number listed on your member ID card.
