

Blue High Performance NetworkSM Summary

The BlueHPNSM comprises an elite team of providers who operate under value-based contracts or who agree to be *clinically and fiscally* responsible for their patients

- Large metropolitan locations that offer a high degree of member choice in where they go to receive care
- Locations with high variability in quality and cost - opportunity to identify the “high value” providers
- Used our local teams and expertise to “narrow” based our design principles to identify those providers willing to be our long-term partners in transforming health care delivery

The BlueHPN establishes broad design principles and offers the following:

- **Quality first:** providers meet quality criteria thresholds among nationally recognized domains of care
- **Cost of Care Savings:** overall market savings is 8-12% savings compared to broad, national PPO
- **Member Experience:** transparency tools available to help members navigate the network
- **Access:** 66+ BlueHPN markets with coverage for all clinical services including professional, facility and ancillary care will be ready to go for 2023.
- **Benefit design:** the BlueHPN offers an EPO model which is designed to offer richer in-network benefits than the PPO, with a zero/not covered benefit for providers outside the BlueHPN
- **Geographic Portability:** narrow network portable across all BlueHPN markets with emergent/urgent care and telehealth services available when members are traveling outside of a BlueHPN market
- **Dual Offering:** The BlueHPN may be offered as a full replacement or as a dual offering against Anthem’s national PPO or certain Select Networks

Key features:

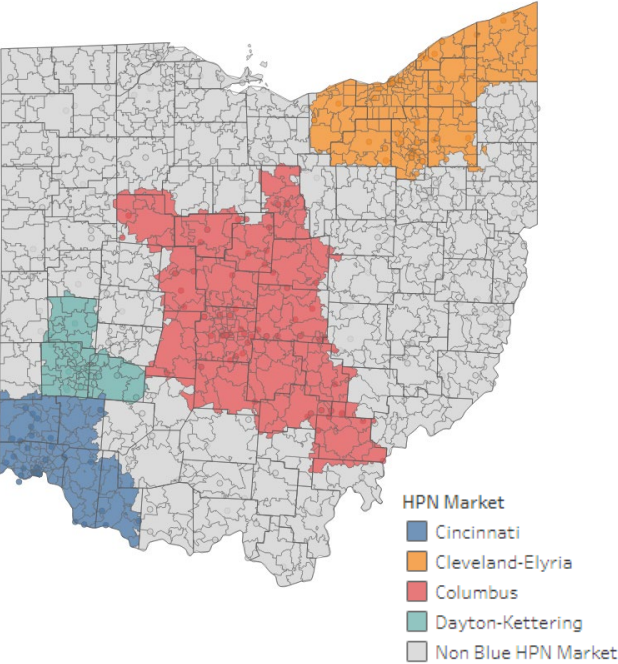

Includes High Quality High Value providers aligned with Anthem's value based care strategy.

The High Performance Network was curated to meet, quality, cost and outcomes criteria
