

UNIVERSITY RADIATION SAFETY OFFICE
DECLARATION OF PREGNANCY

Date (of declaration):

To: Wright State University Radiation Safety Office

From (your name):

This completed form letter is being submitted today to the Wright State University Radiation Safety Office and is the official notification to Wright State University Radiation Safety Program that I am pregnant.

I understand this declaration of pregnancy is a personal choice and optional under Wright State University's Radiation Safety Program. I understand that during the period of pregnancy declaration, my occupationally allowed radiation dose will be reduced 500 millirem to the fetus. I understand, again because of personal choice, I may "undeclare" my pregnancy, in writing, at any time.

I provide the following information to ensure regulatory requirements are met and to assist in determining if additional monitoring or special precautions are necessary.

Regarding My Exposure to Ionizing Radiation

I work with radioactive material under the supervision of:

Radionuclides I will be using during my pregnancy:

I work with radiation generating equipment under the supervision of:

Radiation Generating Equipment I will use during my pregnancy:

I am exposed to radiation from the following radionuclides(s) or radiation-generating equipment but I am not currently working with them (list):

Information Regarding My Pregnancy

My estimated date of conception is:

My delivery date is on or about:

Information Regarding My Dosimetry

I am currently issued the following personal monitoring dosimetry:

1 whole body dosimeter

2 whole body dosimeters

hand (ring) dosimeter

I am currently not issued any radiation monitoring dosimetry.

For any questions, contact my work number:

or my personal phone:

I am aware the Radiation Safety Office has copies of the Nuclear Regulatory Commission guide 8.13, "Instruction Concerning Prenatal Radiation Exposure," that I may review and I can also obtain a copy from the Commission's website: www.nrc.gov. I understand I may speak with a member of the Radiation Safety Office about my radiation exposure. The Radiation Safety Officer is open to consultation if any questions or concerns arise.
