SEI forward view and positioning: Equities

Monthly Commentary

- Equity markets took a holiday in August. Low volatility and reduced trading prevailed as wary investors sought further clarity on the impact of the Brexit vote while also trying to predict central banks' next steps. Global equity markets finished the month slightly positive with strength found in the BRICs (Brazil, Russia, India, and China) as well as other emerging economies. Within the U.S., equities were positive with small companies outpacing the modest gains of their larger counterparts. Sector performance was led by financials and information technology. Traditional defensive sectors (i.e. utilities, telecom, and consumer staples), which have become historically expensive, sold-off most during the month but remain as some of the top performing sectors for the year.

Forward View

- Notwithstanding fragile sentiment on global growth over the past year, most major countries remain in an expansion phase. We continue to believe that global economic growth will grind its way higher, albeit with disruption and less clarity in the U.K. and European Union.
- We are still positive on the outlook for U.S. equities, but expect volatility to continue given that we are in the mature stages of a bull market compounded by the Brexit vote's shadow of uncertainty, which will take time to resolve. The U.S. consumer still looks healthy enough and earnings are expected to grow in the coming quarters.

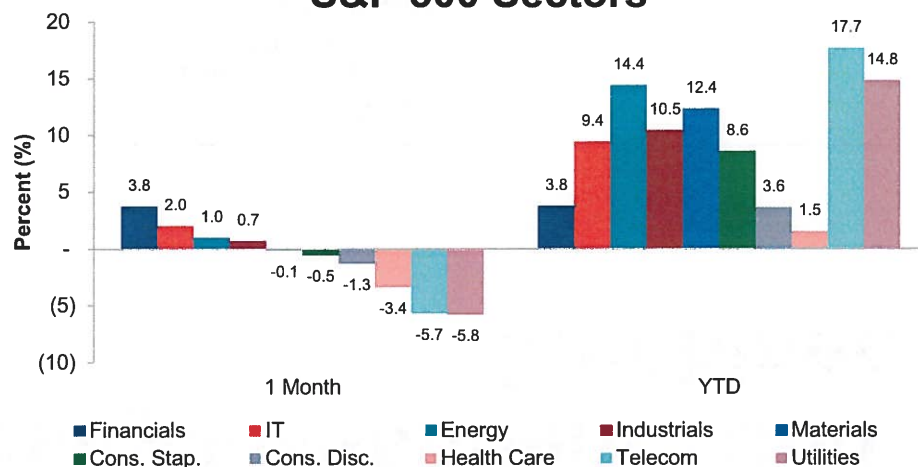

Positioning

- Within U.S. equity strategies, we remain committed to the belief that risk premium represents an attractive opportunity, and have been targeting exposure through deeper value managers at the expense of defensive allocations.
- Within international developed markets, we are concentrating primarily on granular stock-specific drivers and being selective within regions.

S&P 500 Sectors

SEI forward view and positioning: Fixed Income

Monthly Commentary

- Global fixed-income markets were mixed during August. U.S. high-yield bonds enjoyed another month as the strongest performing segment, followed by emerging market debt. U.S. Investment Grade Corporate Credit also advanced slightly, but both U.S. Treasuries and Treasury Inflation-Protected Securities (TIPS) dipped. The U.S. yield curve flattened modestly over the month with shorter-term rates increasing more than longer-term rates as the market digested the Fed's hinting at the possibility of the next rate hike to occur before year end.

Forward View

- We see the potential for rate volatility to persist as uncertainty lingers following the U.K. referendum. With many sovereign global bonds yields negative, U.S. attractiveness could temper upward movement we would expect from any up-tick in economic growth.
- The Federal Reserve appears to be in a bit of a quandary, since the Brexit shock has seemingly upended any possibility of a near-term rise in the funds rate. Market-implied expectations for the next policy-rate move have been pushed out to late-2017. Yet, we admit to a growing uneasiness that the central bank may be falling behind the inflation curve.

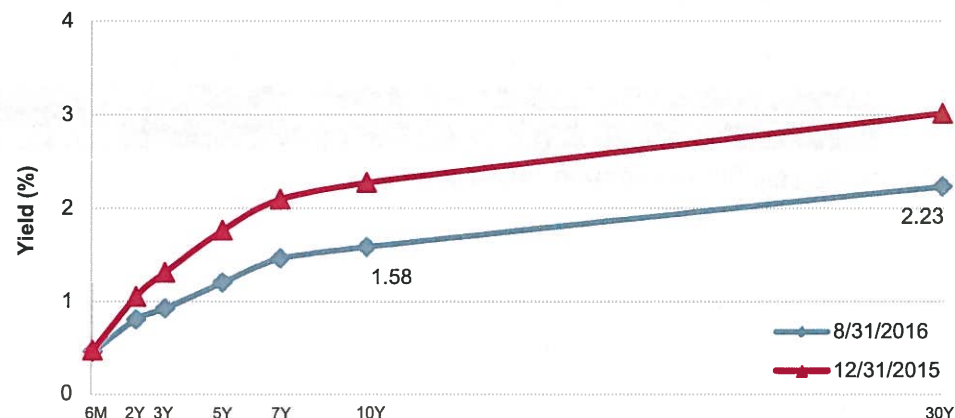

Positioning

- With increased uncertainty surrounding global capital markets, we believe it's important to remain strategically diversified across fixed income.
- We see the potential for rate volatility to persist as uncertainty lingers following the U.K. referendum. With many sovereign global bonds yields negative, U.S. yield attractiveness could temper the upward movement we would expect from any up-tick in economic growth.

Disclosures

Fund / Benchmark Disclosures

The SEI Alternative Funds, with the exception of its structured credit and energy debt products, are “fund-of-funds”, which means that the funds invest in underlying third party funds. Alternative investments by their nature involve a substantial degree of risk. Investment values and performance information calculated by fund of funds are generally based on investment values reported by the underlying third party funds which may use a number of valuation methods depending on asset class and may provide such valuations on a delayed timeline. For interim reporting, fund of fund valuations are typically estimates and may be subject to later adjustment.

The value of investments in the SEI Alternative Fund(s), including the structured credit and energy debt products, as presented in this report are calculated pursuant to each fund’s valuation procedures on either a monthly or quarterly basis as described in the Confidential Private Placement Memorandum of each fund. All of the SEI Alternative Funds undergo an annual audit. Alternative, Property and Private Assets performance is calculated gross of investment management fees and net of administrative expenses and underlying fund expenses. However: Structured Credit Fund performance is calculated gross of investment management fees and net of administrative expenses; SEI Offshore Opportunity Fund II Ltd. Class A performance is calculated net of investment management and administrative fees; and Energy Debt Fund performance is calculated net of management fees and operating expenses and is based on the July 2015 series. Clients implemented via collective investment trusts incur product-level fees, including trustee and administrative fees, which will affect performance.

None of the SEI Alternative Funds, their respective boards, SEI or any of their affiliates will be able to confirm independently the accuracy of the valuations provided by underlying investments or other third parties. Your investment is illiquid, and you may not realize the estimated value of your investment when you attempt to dispose of your investment.

The value of investments and performance information for the Alternative Funds provided herein are presented on a monthly or quarterly lag, as noted below, based on the timing of reporting from, or attributable to, the underlying investments. Values and performance information for the SEI Special Situation Fund and SEI Core Property Fund are updated on the calendar quarters and presented on a one month lag. Values and performance information for the SEI Opportunity Fund, SEI Hedge Fund SPC, SEI Structured Credit Fund and SEI Energy Debt Fund are updated monthly, presented on a one month lag. Past performance does not guarantee future results. This report does not constitute an offer to sell or a solicitation of an offer to buy an interest in any SEI Alternative Fund. Such an offer or solicitation may be made only by means of the Confidential Private Placement Memorandum of such fund.

The SEI Global Private Assets III, L.P. is valued on a quarterly basis. Returns in this report for the SEI Global Private Asset Fund reflect the Fund’s value as determined as of the end of the prior quarter, plus cash flows for the current quarter. Therefore, the returns shown here may differ from what the Fund’s actual return will be when its value for the current quarter is calculated. Please refer to the SEI Global Private Asset III, L.P.’s Limited Partnership Agreement and Confidential Private Placement Memorandum for further information regarding valuation.

Hist Blend: SEI High Yield Bond Fund: From the period of 12/31/1994 through 12/31/1998, the SEI High Yield Bond Fund Index was comprised of 100% Credit Suisse High Yield Index. From 1/1/1999 through 3/31/2004, the composition was 100% Credit Suisse High Yield Developed Countries Only Index. From 4/1/2004 onward the composition is 100% BofA ML US High Yield Constrained Index.

Fund / Benchmark Disclosures

Hist Blend: SEI Emerg Mkt Debt: From the period 11/30/2005 through 6/30/2006, the SEI Emerging Market Debt Fund Index was comprised of 100% JP Morgan EMBI Global Index. From 7/1/2006 through 6/30/2012 the composition was 100% JP Morgan EMBI Global Diversified Index. From 7/1/2012 onward the composition is a 50/50 blend of JPMorgan EMBI Global Diversified Index and the JP Morgan GBI EM Global Diversified Index.

Disclosures

General Disclosures

For those SEI Funds which employ the 'manager of managers' structure, SEI Investments Management Corporation has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee the sub-advisors, and recommend their hiring, termination and replacement.

All performance numbers greater than one year are annualized. All figures in this report are based on trade date and accrual accounting methods. As a result, these figures may not match your custody statement.

Certain fund benchmarks used to measure performance may be changed by SEI to more appropriately reflect a fund's investment style.

The Total Index reported is customized for your account. It is based on the benchmarks for each asset class in which you are invested, weighted based on your target allocations. The Total Index is adjusted to reflect any changes in your target allocations but not changes in your actual allocations which may occur due to changes in the market value of your investments.

If there has been a change in the financial condition of your organization, please notify your SEI Client Portfolio Manager immediately.

This presentation is provided by SEI Investments Management Corporation (SIMC), a registered investment adviser and wholly owned subsidiary of SEI Investments Company. The material included herein is based on the views of SIMC. Statements that are not factual in nature, including opinions, projections and estimates, assume certain economic conditions and industry developments and constitute only current opinions that are subject to change without notice. Nothing herein is intended to be a forecast of future events, or a guarantee of future results. This presentation should not be relied upon by the reader as research or investment advice (unless SIMC has otherwise separately entered into a written agreement for the provision of investment advice).

There are risks involved with investing including loss of principal. There is no assurance that the objectives of any strategy or fund will be achieved or will be successful. No investment strategy, including diversification, can protect against market risk or loss. Current and future portfolio holdings are subject to risk. Past performance does not guarantee future results.

Index returns are for illustrative purposes only and do not represent actual fund performance. Index performance returns do not reflect any management fees, transaction costs, or expenses, which would reduce returns. Indexes are unmanaged and one cannot invest directly in an index.

In the event prior performance was provided to SEI and included in this report, neither SEI nor its affiliates assumes any responsibility for the accuracy or completeness of such prior performance and such information has not been independently verified by SEI.

Disclosures

General Disclosures - continued

The Portfolio Return and underlying holdings performance numbers are calculated using Gross Fund Performance, using the Modified Dietz method of calculation, which considers the timing of cash flows during the periods. Gross fund performance reflects the effective performance of the underlying mutual funds that are selected or recommended by SIMC to implement an institutional client's investment strategy. Gross fund performance does not reflect the impact of fund level management fees, fund administration or shareholder servicing fees, all of which, if applicable are used to offset the account level investment management fees the client pays to SIMC. Gross fund performance does reflect certain operational expenses charged by the funds and the reinvestment of dividends and other earnings. The inclusion of the fund level expenses that the client incurs but that are offset against the client's account level investment management fees would reduce the gross fund performance of the mutual funds. Alternative, Property and Private Assets performance may be reported on a monthly or quarterly lag.

Any presentation of gross mutual fund performance of underlying mutual fund investments or gross account level performance is only intended for one-on-one presentations with clients and may not be duplicated in any form by any means or redistributed without SIMC's prior written consent.

Through June 30, 2012, annual performance is calculated based on monthly return streams, geometrically linked. From June 30, 2012 onward, annual performance is based upon daily return streams, geometrically linked as of the specified month end.

Performance results do not reflect the effect of certain account level advisory fees. The inclusion of such fees would reduce account level performance, particularly when compounded over a period of years. The following hypothetical illustration shows the compound effect fees have on investment return: For an account charged 1% with a stated annual return of 10%, the net total return before taxes would be reduced from 10% to 9%. A ten year investment of \$100,000 at 10% would grow to \$259,374, and at 9%, to \$236,736 before taxes. For a complete description of all fees and expenses, please refer to SIMC's Form ADV Part 2A, the investment management agreement between SIMC and each client, and quarterly client invoices.

Net Portfolio Returns since 1/1/2014 reflect the deduction of SIMC's investment management fee and the impact that fee had on the client's portfolio performance. Prior to 1/1/2014, Net Portfolio Returns deduct a proxy annual fee for all periods to demonstrate the impact that SIMC's investment management fee had on the portfolio performance. However, this is a hypothetical calculation, as it does not reflect the actual fees paid by the client during the period. Please see your client invoice for actual fees paid.

Performance prior to the client's inception date with SEI was provided to SEI by the client's prior provider ("Prior Performance"). Neither SEI nor its affiliates assumes any responsibility for the accuracy or completeness of the Prior Performance and such information has not been independently verified by SEI. Performance since the client's inception date is that of SEI and has been linked to the Prior Performance.

SEI performance may differ from that of your manager, custodian or consultant due to differences of pricing, valuation and performance methodology.
