

## **Elections Processes Working Group**

The Elections Working Group will examine past practices used during WSU Faculty Senate elections and surveys and evaluate them and make possible suggestions for procedural changes (not already addressed in the Faculty Constitution).

This working group will examine and evaluate current practices regarding the exercise of elections and surveys through the Faculty Office. It will also address any procedural concerns or questions raised in past elections and surveys, as well as structures and processes at other universities, to recommend practices to be adopted for future elections and surveys.

This working group will report to the Faculty Senate EC no later than January 13, 2020, so that recommendations can be discussed within the EC and the Faculty Senate and so that standardized processes may be enacted in time for the spring 2020 election cycle.

Working group membership will include at least one representative from the EC, at least one former (or current) Senate Parliamentarian, and at least 4 current or former faculty senators.
