COVID Legislative Update

- **H.B. 218: COVID-19**
  - A university shall not require a student or employee to receive a vaccine, drug, biological product, or genetic immunotherapy that utilizes mRNA, DNA, or any other genetic vaccine technology that has not been granted a biologics license from the FDA.
  - If a university requires an employee to receive a vaccine, drug, biological product, or genetic immunotherapy that utilizes mRNA, DNA, or any other genetic vaccine technology that has received full FDA approval, the employee can satisfy the requirement by:
    - Taking the vaccine, drug, biological product, or genetic immunotherapy that utilizes mRNA, DNA, or any other genetic vaccine technology;
    - Taking the vaccine, drug, biological product, or genetic immunotherapy that utilizes mRNA, DNA, or any other genetic vaccine technology that is available under Emergency Use Authorization;
    - Filing an exemption with the university, which include:
      - Medical contraindications (Employee provides a doctor’s note that is signed by the physician),
      - Natural immunity (Employee provides results of antibody testing that shows the presence of antibodies equal or in excess to what a vaccine provides)(ODH will set policy on frequency of antibody testing),
      - Reasons of personal conscience (Student just has to provide written statement which must be honored),
      - Religious convictions (Employee just has to provide written statement which must be honored)

- This Bill replaces **HB 477, HB435, HB248**

- **SB 209**
  - This would prohibit a campus-wide mask mandate for classes or activities (including activities at the Nutter Center) unless it is in a medical setting
